INTRODUCTION

This is the first volume of the Lancaster series (Part II) of the edition of the London customs accounts (TNA: PRO E122). It is comprised of 1) the wool customs and subsidy particulars of account for 1400, 2) the petty customs particulars of account for 1400/01, 3) the tunnage and poundage particulars of account for 1401, 4) the wool customs and subsidy controlment roll for 1403, 5) the wool customs and subsidy particulars of account and controlment roll for 1404, 6) the wool subsidy particulars of account for 1405/06, 7) the wool subsidy particulars of account for 1406, 8) the wool customs and subsidy particulars of account and controlment roll for 1410 and 9) the petty customs particulars of account and controlment roll for 1410.

Everything the reader needs to understand about the English customs system – and the peculiarities of the customs administration in London – has been detailed in the introduction to the pilot volume.¹ There are, however, some issues relating to the accounts edited here which need to be discussed.

TUNNAGE AND POUNDAGE

Tunnage and poundage were late subsidies, first granted in 1347.² Moreover, they were not granted regularly until the middle period of Richard II's reign, starting in 1386. In the course of time, the rates gradually went up. Poundage was an *ad valorem* duty, collected at 6d per 20s of value until 1386. It then rose to 12d/£, staying at that level until the 16th century, except for the period from 3 Apr. 1401 to 3 Apr. 1403, when Henry IV reduced it to 8d/£. Tunnage began to be collected later than poundage, at an initial rate of 12d per tun (252 gallons) for the period 28 Feb. to 24 June 1350.³ The next grant (24 Sept. 1350 to 30 Sept. 1351)

raised the charge to 3s 4d/tun.⁴ From 1371 to 1386, tunnage remained at 2s/tun, rose then to 3s/tun and remained there except for Henry IV's first grant (1401-3) when it was reduced to 2s/tun.⁵ Until well into the 15th century, the rates for indigenous and alien merchants remained the same. The rates obtaining during the period covered by this volume are shown in Table 1.

WOOL CUSTOMS AND SUBSIDY

While the customers accounted for the crown's revenues from wool customs and subsidy in the normal way until 1404 (Accounts 1, 4, 5), the account for the wool subsidy in 1405/06 (Accounts 6, 7) is separate from the account for the wool customs.¹³ The normal procedure was resumed in 1410 (Account 8). This will require some explanation.

Seemingly battered on all sides by the rebellion in Wales, French naval incursions on the coast and internal revolts, Henry IV's monarchy was in a parlous state in the early years of the fifteenth century. The king was forced to turn to parliament for fresh subsidies to ward off military disaster, but the Commons were not in a giving mood, rightly suspecting that vast sums had been frittered away on

¹³ The wool customs accounts for the 29 Sept. 1405 to 28 Feb. 1406 and from 28 Feb. to 25 May 1406 have not survived. See, however, Stuart Jenks (ed.), *The Enrolled Customs Accounts (PRO, E356, E372, E364) 1279/80-1508/09 (1523/24) Volume 7: E356/17, E356/18* (List and Index Society 324), London 2008, E356/17, No. 92, 93.

extravagances for the royal household and on annuities for royal favorites.¹⁴ Consequently, on 25 Mar. 1404, the Westminster parliament – having examined the king's revenues and compared them to Richard II's, finding them much reduced and further depleted by grants – mandated that all revenues from the wool subsidy (and the other subsidies) which were not earmarked for the royal household (which was held to a tight budget of £12,100) or the repayment of the crown debts were to be paid to four war treasurers, two of them Exchequer clerks and the others London citizens. These were to ensure that this revenue was spent only on the prosecution of the wars and were to be held accountable for income and expenditure.¹⁵ As the archbishop of Canterbury explained to the Commons on 1 Mar. 1404, it was

the will of our same lord the king that with regard to the grant to be made by the lords and commons now in this present parliament for the wars and for the defence of the realm, certain treasurers to receive the said grant should be appointed on the advice of the said lords and commons, in order that the money raised from this should be put towards the wars and to no other use.¹⁶

This quite extraordinary measure did not solve the problem. The crown was effectively bankrupt by the summer of 1404 and the king was forced to call another parliament, to convene in Coventry on 6 Oct. 1404.¹⁷ Here, the commons did, in fact, yield to the king's pleas and grant him – in addition to tunnage and poundage and two parliamentary subsidies – the wool subsidies (at the rates of 43s 4d/sack for indigenous merchants and 53s 4d/sack for aliens) for two years following immediately upon the expiry of the old grant on 29 Sept. 1405.¹⁸ However, they added a stinging proviso:

On condition that the aforesaid two fifteenths and two tenths [*parliamentary subsidies*], and the subsidies on wool, hides and woolfells, and the three shillings per tun and twelve pence in the pound [*tunnage and poundage*], are spent specifically on the defence of the realm, in accordance with the form and intent of this grant, in the aforesaid manner, and put to no other use, as Thomas Lord Furnivall, and John Pelham, knight, the treasurers of war assigned and appointed in this present parliament, who will receive the said fifteenths and tenths and subsidies, shall answer for and render account to the commons of the realm at the next parliament. And that the said treasurers should not hand over or pay any money from the said subsidies, fifteenths and tenths, for any purpose other than the defence of the realm in time to come; and if any people, or

whatever estate or condition they may be, demand, receive or bear any mandate, writ, letters patent, letters of privy seal or letters under the king's signet, or tallies from the receipt of the exchequer, and they receive, by virtue and authority of the same letters, mandates or tallies, any money from the said fifteenths, tenths and subsidies, or any part of the same, for wars or any debts owed by our lord the king before the day of this present parliament, excepting only for the preservation of the defence of the realm in time to come, that they and each one of them shall incur the penalty of treason.¹⁹

In short, the disbursement of all funds from the wool subsidy was taken out of the king's hands and entrusted to the war treasurers who were to employ these revenues solely for the defence of the realm and to answer to parliament. Any misuse was to be punished as treason.

It was a logical consequence of this measure that the collection of the wool subsidy was hived off from the collection of the wool customs and entrusted to different men, thus creating two separate wool customs administrations. The king, having retained (by virtue of the royal prerogative) his right to collect the wool customs, named John Hende and Edmund Chymbeham (at the suggestion of the treasurer) as wool customers in London on 5 Nov. 1405,²⁰ but it was at the suggestion of the treasurers of the wars that William Staundon and Henry Somer were named to collect the wool subsidy in London,²¹ and the same procedure was employed when Henry Somer was replaced by Richard Merlawe on 6 Feb. 1406.²²

This is what accounts for accounts 6 and 7, which record the receipts from the wool subsidy in 1405/06 independently of the wool customs receipts. The enrolled account for the first period, running from 29 Sept. 1405 to 28 Feb. 1406, is entirely

straightforward, recording merely that Staundon and Somer had paid all revenues (£5079 3s 6½d) to the war treasurers.

However, the enrolled account for the wool subsidy during the second period (28 Feb. to 25 May 1406), was considerably more complicated, since the legal situation had changed. According to an agreement reached in the parliament at Westminster,²³ English merchants were to be responsible for the security of shipping on the high seas from 1 May 1406 to 29 Sept. 1408. In order to enable them to hire the soldiers and equip the ships necessary for this purpose, they were to receive all income from tunnage and poundage and one quarter of the wool subsidy receipts from 1 Apr. 1406. In addition, they were to receive a sum corresponding to all receipts from tunnage and poundage from 2 Feb. to 1 Apr. 1406 plus one quarter of the wool subsidy receipts during that time. However, this sum was to be deducted from the the king's share of wool subsidy receipts (the remaining three quarters) after 1 May 1406. As complicated as it might sound, the agreement was really quite simple: The merchants were to receive all of the tunnage and poundage income from 2 Feb. 1406 onward and one quarter of all wool subsidy receipts from 2 Feb. 1406 onward, even if they were to be deducted from different items.

When they accounted,²⁴ William Staundon and Richard Merlawe began by stating the revenue received from the wool subsidy between 28 Feb. and 1 Apr. 1406 as £1532 17s 10½d, dividing this sum into two portions, corresponding to the one quarter (£383 4s 5½d) earmarked for the merchants and the remaining three quarters (£1149 13s 5d) belonging to the king.

They then stated the revenue received from the wool subsidy between 1 Apr. and 25 May 1406 as £2720 6s ½d, dividing this sum into two parts, the one received before 1 May (£1307 12s 1d) and the other after (£1412 13s 11½d). They then divided the whole sum for this second period (£2720 6s ½d) into two parts, namely the one quarter (£680 18d) earmarked for the merchants and the remaining three quarters (£2040 4s 6½d) due to the king.

Now, according to the terms of the parliamentary agreement, the merchants should have received (1) one quarter of the London wool subsidy receipts from 2 Feb. to 1 Apr. 1406 (£55 11s 10½d up to 28 Feb., £383 4s 5½d thereafter) and (2) all of the London tunnage and poundage receipts (£966 13s 11¼d) from 2 Feb. to 25 May 1406, totalling £1405 10s 3½d. This second sum should have been deducted from the king's portion of the wool subsidy from 1 Apr. to 25 May 1406. However, there was not enough money in the kitty, since the king's three quarters of the wool subsidy receipts between 1 Apr. and 25 May 1406 only amounted to only £1059 10s 5d, leaving £345 19s 10½d unpaid. The merchants did, however, receive one fourth of the wool subsidy receipts during the period 1 Apr. to 25 May 1406, amounting to £680 18d.

²³ RP 3, p. 569-71. Parliament sat from 1 Mar to 22 Dec. 1406, being prorogued from 3-25 Apr. and from 19 June to 13 Oct.

²⁴ TNA: PRO, E356/17 m 12. Calendered: Jenks, *Enrolled Customs Accounts*, vol. 7, E356/17, No. 93.

Both sums were duly paid over to Robert Haxton, who had been nominated by the English merchants as receiver of funds for the defence of the realm,²⁵ as mandated by a royal writ directed to the Exchequer²⁶ and documented by two receipts issued by Haxton.²⁷

Finally, it is not idle to point out to the reader that there is no index of ships by name or by home port in this volume because no ship or home port is named in any account.

The customers' particulars of account were fiscal documents, forming an integral part of the procedure imposed on the customers when accounting for the crown's customs income before the Exchequer. As such, they were marked up by the auditor when he summed up the crown's income according to the various categories and tariffs. These marginated annotations form an integral part of the source and, in my view of it, deserve to be reproduced in full. I have done this in the following way. First of all, the auditor's summations of income at the end of each page or membrane (including the jottings reproducing the position of the counters on the counting table) have been reproduced as written in the account. Second, all other marginated notes (e.g. a cross or an asterisk indicating an error) are noted in the normal way in the critical apparatus. However, recording the eternally repetitive marginal notes on the tariff categories to which particular products belonged (*panni ind'*, *panni al'*, *panni Hans'*, *per breve* etc.) call for a different solution, since including them in the critical apparatus would simply blimp it up to no useful purpose. Consequently, I have indicated them in the text by employing superscript letters in angle brackets (e.g. <sup>^{A>}De Roberto Derlyngton) and resolving these in a block at the bottom of the page (*Auditor's marginated notations L: <sup>A> panni ind'*).

The problem of the hundredweight is exceedingly vexed. While it is well known that a hundredweight can correspond to 100 lb., 112 lb. or 120 lb. avoirdupois,²⁸ there is no way to know which of these three values applies when a customer writes *c lb.* or fractions and multiples thereof. Just occasionally, when the particulars of account and the controlment roll have survived, some insight is possible, for instance if one of the two records a particular merchant's exports of pewter vessels as *di' c lb. vasorum stanni* and the other the same goods as *lvj lb. vasorum stanni*.²⁹ But these cases are far too rare to inspire confident generalizing. Consequently, I have decided to leave the matter unsolved, marking the text in such a way that the reader can easily reconstruct the entry. The most common notation of weight – multiples of 'c' – has not been marked up. Thus 'ij^c lb.' is

²⁹ Therefore, when transcribing entries regarding the export of pewter vessels, I have retained the hundredweight (e.g. *pro 9 centenis vasorum stanni*).

simply transcribed as 300 lb. If the thousand sign was used, the number is marked with a cross: thus, 'ij M^l lb.' is transcribed as 2000[†] lb. (but xx^c lb. as 2000 lb.) If the sign for one half is used, this is indicated by an asterisk: thus, 'di' c lb.' is transcribed as 50* lb. (but 'l lb.' as 50 lb.) And finally, if the sign for one quarter is used, this is indicated by a double cross: thus, 'c q' lb.' is transcribed as 125[‡] lb.

Diplomatic Notes on the Form of the Edition

The transcriptions of Latin documents in this edition observe the conventions of the *Monumenta Germaniae Historica*. The source texts (and all variants) are reproduced in normal type, while editorial intrusions are printed without exception in italics (e.g. mardre *L3*, *in error*). Unambiguous abbreviations are expanded silently, without using square brackets or italics to indicate missing letters. u/v and i/j have been regularized silently to accord with pronunciation: thus *vniuersalis* in the source text is rendered *universalis*, while 'i' is transcribed if the letter is pronounced as a vowel (*imperii*), and 'j' if the letter is pronounced as a consonant, i.e. like the 'y' in 'you' (*majestas*), even if the source writes *imperij* and *maiestas*.

Personal names and place names are transcribed exactly as written and only regularized in the Index of People and Places.

Roman numerals are reproduced as Arabic numerals, except for the sovereign's ordinal (*Edwardi ivth*). Arabic numerals which occur in the source texts are indicated by bold type. *ob'* is given as ½d, *q'* as ¼d and *ob' q'* as ¾d.

Following the convention in German, I have used a full stop after a number to indicate the ordinal rather than the cardinal, if a number is not written out. Thus, *27. die Januarii* (p. 147) is to be understood as *vicesimo septimo die Januarii*, rather than *viginti septem die Januarii*.

When transcribing the customs accounts, I have numbered the ships consecutively in italics in square brackets. The individual paragraphs of longer texts have also been numbered in the same way. The reason for this is that the web version of the accounts and accounting materials for the Lancastrian period has no pagination, since the amount of text displayed on the screen depends on the size of the monitor and its resolution. Consequently, cross references – whether within a single document, from one document to another or in the indices – to 'page thus-and-such' are meaningless, and some internal sub-division of the text which can be linked in is unavoidable. Since some scholars will want to use the printed version of the edition and others the web edition, it is necessary to provide a common basis. Thus, if one scholar refers to ship No. 24 in the digital version of a particular account, those using the printed version will be able to find the vessel in question.

All dates and cross references in the source texts have been resolved in italics in square brackets in the text of the edition, rather than in footnotes.

If both the particulars of account and the controlment roll survive, certain variants have been suppressed to avoid inflating the text-critical apparatus. Thus, neither the substitution of 'y' in one text for 'i' in the other (e.g. Willyamson, Williamson) nor middle English plural variants (-es, -is, -ys etc.) have been noted in the apparatus criticus. In general, I have limited the notation of textual variants to

those cases in which the variant spelling of a word changes the pronunciation. Thus, the variant *federbeds* will be noted against *fetherbeds*, but not *fedderbeds* or *federbeddes* against *federbeds*.

Punctuation is artificial and ignores all medieval full stops, commas and so forth. Since Latin is a syntactic language (like German), the eminently useful MGH convention – namely to employ punctuation (according to the pre-reform German rules) to mark up the grammatical structure of the sentence – has been employed here. I have also broken up the stylistically elegant, but utterly incomprehensible run-on Latin sentences of the source texts into manageable units.

Since we are dealing with late medieval administrative Latin, there are some cases which call for local by-laws.

First of all, there are a number of middle English words embedded in the Latin texts which have to be assigned a gender, since they are often modified by an abbreviated adjective (e.g. *pro 1 parv' fetherbed*). Since the adjectives are written out in a number of instances (*pro 1 parvo fetherbed*), I have arbitrarily imposed a masculine grammatical gender on all middle English words rather than litter the edition with apostrophes.

Second, the sources themselves are in a muddle as to whether the words *custuma* and *subsidium* are singular or plural, and usually avoid the problem by writing *cust'* and *subs'*. If a scribe does write out the one or the other word, it is almost inevitable that he will contradict himself, writing *custuma* in one line and *custume* a few lines later. This muddle is not merely the result of scribal carelessness or low standards of Latinity. In the fifteenth century, it was possible to differentiate between the collective noun (in the singular) denoting the charges to be paid and the individual sums (in the plural) which each merchant rendered. Even bearing this in mind, however, scribes are simply not consistent. Taking each individual text as a whole, I have done my best to reproduce what the scribe seemed to be thinking.

II PETTY CUSTOMS PARTICULARS OF ACCOUNT 24 NOV. 1400-10 APR. 1401

Particulars of account of William Loveney and Thomas Denton for the issues of the petty customs from 24 Nov. 1400 to 10 Apr. 1401

L TNA: PRO, E122/72/4. Original particulars of account bound in Exchequer style (7 membranes numbered contemporaneously in the upper right-hand corner of the membrane and consequently hidden in the stitching: Imports: 1 rotulus (m 1), 2 rotulus (m 2), 3 rotulus (m 3), 4 rotulus (m 4); Exports: secundus (m 5), 3 (m 6), 4 (m 7). Although no membrane designated as primus containing exports is transmitted, the account would seem to be complete.¹ Parchment. Unsealed. The auditor has entered a dot (•) over each ship and (in the right-hand margin) after many of the merchant's customs charges. The account has suffered some damage: the writing is very faint on m 5, and the parchment is badly worn in places.

TUNNAGE AND POUNDAGE PARTICULARS OF ACCOUNT

3 APR. – 29 SEPT. 1401

Account of Robert Shirwynd and Thomas Gray for the issues of tunnage and poundage during the period from 13 June to 29 Sept. 1401.

L TNA: PRO, E122/161/28. Original particulars of account bound in Exchequer style (of the original 9 membranes of the account for 13 June to 29 Sept. 1401¹ only 4 survive – containing all the imports –, and they are massively damaged by water, so that the greater part of each membrane has rotted away). Parchment. Unsealed.

Dating: In this account, tunnage was charged at 2s/tun and poundage at 8d/£. These rates were valid only for the period from 3 Apr. 1401 to 4 Nov. 1403, during which there were four accounts.² This account can be confidently assigned to the first of these accounting periods because the arrival of the galley of Bernard Justinian is recorded on m 1d. Justinian was appointed vice captain of the London galleys on 27 Jan. 1401.³

PARTICULARS OF ACCOUNT AND
CONTROLMENT ROLL
30 MAR. – 12 DEC. 1404

Controlment roll of Robert Denton for issues of the wool customs and subsidy in the period from 30 Mar. to 12 Dec. 1404

L1 TNA: PRO, E122/225/41/1. Original particulars of account. Parchment. Unsealed. This scrap of parchment contains nothing more than the (barely decipherable) heading of the account. Hence, transcription would be pointless.

L2 TNA: PRO, E122/72/8. Original controlment roll bound in chancery style (6 membranes; no evidence of contemporaneous numbering; the parchment is badly worn and stained in places). Parchment. Unsealed.

 WOOL CUSTOMS AND SUBSIDY
 PARTICULARS OF ACCOUNT AND
 CONTROLMENT ROLL
 23 MAR.–26 JULY 1410

Particulars of account of John Hende and Richard Whityngton for the issues of the wool customs and subsidy in London in the period from 23 Mar. to 26 July 1410 together with the controlment roll of John Feerby for the same period.

L1 TNA: PRO, E122/72/27 m 3-4.¹ Original particulars of account bound in Exchequer style. Parchment. Unsealed. The auditor has entered a dot (•) over each entry concerning the income from customs and subsidy, indicating that he had checked it and that it was correct. On the outside of the rolled up account (m 4d) London'; Johannes Hende, Ricardus Whityngton collectores magne custume ibidem is entered.

L2 TNA: PRO, E122/72/27 m 2. Original controlment roll bound in chancery style. Parchment. Unsealed. The income from customs and subsidy, the equivalents of the woolfells in sacks and the summation of customs and subsidy revenue from each ship have been omitted, as is usual in controlment rolls.

IX:
PETTY CUSTOMS
PARTICULARS OF ACCOUNT AND
CONTROLMENT ROLL
23 MAR. – 29 SEPT. 1410

Particulars of account of Richard Style and Thomas Denton for the issues of the petty customs during the period from 23 Mar. to 29 Sept. 1410 together with the controlment roll of Thomas Vale for the same period.

L1 TNA: PRO, E122/76/32. Original particulars of account bound in Exchequer style (11 membranes). Parchment. Unsealed. Contemporaneous numbering of the membranes in the apex: 1 (m 1), 2 (m 2), 3 (m 3), (m 4 not numbered), 5 (m 5); rotuli collectorum parve custume (m 6); 2^{us} rotulus (m 7), 3 (m 8), 4 (m 9), 5 (m 10), (m 11 not numbered). De tempore Ricardi Style et Thome Denton collectorum parve custume in portu London' a festo Pasche anno 11^o [23 Mar. 1410] usque festum Michaelis proxime sequens [29 Sept. 1410] has been entered on the upper margin of m 1. The auditor has entered dots above the value of each merchant's imports. As for the exports, the auditor has entered a dot either above the value of each merchant's goods if customed ad valorem, or, if cloth, above Ind', Al' or Hans.

L2 TNA: PRO, E122/77/2. Original controlment roll bound in Exchequer style (11 membranes). Parchment. Unsealed. Exports (m 1-6) and imports (m 7-11) were originally bound separately and subsequently stitched together with a parchment tag. Contemporaneous numbering of the export membranes in Roman numerals in the upper right-hand corner of the membrane and Arabic numerals in the apex: 1 (m 7); 2, 2 (m 8); 3, 3 (m 9); 4 (m 10); 5 (m 11). Rotuli contrarotulatoris parve custume in portu London' has been entered on m 5d, Rotule [sic] Thome Vale contrarotulatoris parve custume regis in portu London' on the upper margin of the first export membrane (m 7); and Rotuli Selvilli Vale contrarotulatoris parve custume London' on the lower margin of m 9d. Since this is a controlment roll, the entries recording customs paid by each merchant and the sum of issues at the end were omitted.

INDEX OF PEOPLE AND PLACES

In accordance with current usage, the first names of Englishmen and -women have been standardized to their current forms. Thus Willelmus in the accounts is indexed as William and so forth. Italian and Spanish first names are given in the 'ablative' (Andrea, Beaceo, Roderigo rather than Andreas, Beaceus, Roderigus). The first names of other foreigners, who are largely Dutch and German, are normally indexed in something approaching their modern forms, e.g. Johannes, Jacob, Herman, Hugo rather than Hugh (which would indicate an Englishman). However, it is not possible to be entirely consistent. Take, as an example, Willelmus. Is one to index Hanseatic merchants as Wilhelm, but Dutch merchants and shippers as Willem or Wim and the Dinanters as Guillaume? To do so would simply be to introduce incredible confusion, entirely leaving aside the intractable problem of distinguishing between merchants of Dutch and Hanseatic origin. Therefore, in a number of cases I have indexed Dutch and German merchants' first names in the current English form: e.g. Paul, William, Laurence, Andrew, Henry.

Family names have been grouped, where possible, in the index, with cross references leading the reader from the variants to the main entry, which records all variant spellings in parentheses. However, given the inconsistency of the customers' scribes, I have found it impossible to resolve all doubts and have therefore tried to steer a middle course between the splitters and the lumpers. There are cases where there can be no doubt that divergent spellings denote one and the same merchant. On the other hand, there are cases where I am all but certain that variant spellings denote one person, yet am troubled by nagging doubts. In these cases I record the names separately and referred back and forth ('see also N.N.').

The order of the family names in the index is phonological, so that, for instance, 'y' is alphabetized as 'i'.

The petty customs accounts (II, IX) distinguish between alien and Hanseatic merchants only if cloth exports are involved, but not in the case of imports or other exports. Therefore, if an alien merchant does not export cloth, it is impossible to determine whether he is a Hansard or a non-Hanseatic alien. In these cases, I have left the question unsolved, identifying the merchant only as (alien/Hanseatic).

Place names are in small capitals.

INDEX OF SUBJECTS

The index is structured so as to serve as a glossary. Hence, the main entry is under the word as it appears in the sources (*zinziber*), and a cross-reference leads the reader from the modern English term to the main entry (ginger see *zinziber*). If a term is in Middle English, the plural form is also given (e.g. *alle hafte*, -s); if in Latin, the genitive (e.g. *allec*, *ecis*). More than one reference per page is not noted.
