INTRODUCTION

This is the third volume of the Lancaster series (Part II) of the edition of the London customs accounts (TNA: PRO E122). It is comprised of 1) the tunnage and poundage controlment roll for 1428/29; 2) the wool customs and subsidy controlment roll for 1429; and 3) the petty customs particulars of account for 1429/30.

Everything the reader needs to understand about the English customs system – and the peculiarities of the customs administration in London – has been detailed in the introduction to the pilot volume.¹ There are, however, some issues relating to the tunnage and poundage account for 1428/29 which need to be discussed.

EXEMPTIONS: INDIGENOUS MERCHANTS

The parliamentary grant of tunnage and poundage for indigenous merchants² expired on 4 April 1429. This meant that, as of 5 April, indigenous merchants became invisible as far as the collectors of tunnage and poundage were concerned. Any merchant recorded as importing or exporting goods after 4 April 1429 must therefore be either a Hansard or some other sort of an alien. In the index of people and places, I have recorded this information in square brackets – [alien/Hanseatic merchant] – since it is not recorded in the account itself.

The expiry of the parliamentary grant proves to be an important fact, since the controlment roll itself is in parlous shape, having rotted from the bottom when rolled up, so that a small wedge of parchment is missing at the top left of the recto side of the membrane and a larger wedge in the middle. The third wedge was large enough that the bottom of each membrane has completely rotted away from its parent. Eleven bottoms³ of the original 37 full membranes (m 38 is a short *cedula*)⁴ have not survived, and when the account was restored in the PRO, the order of the remaining 26 membranes was not maintained. I have restored those membrane bottoms whose original position in the account could be determined beyond doubt (e.g. by the date given for the ships in both halves) to their proper position, but this has not always proved possible. The remaining, orphan membranes (mm 39-40, 42-44, 51-54) are transcribed at the end of the edition (p. 110-122) in the order

¹ Stuart Jenks (ed.), *The London Customs Accounts 24 Henry VI (1445/46)*, Cologne: Böhlau 2018.

² *Rotuli Parliamentorum* 4, p. 337.

³ In particular, the bottoms of m 24-27, on which the imports in the Venetian galleys of Georgius Bembo and Jacomo Barbarigo were recorded, have not survived.

⁴ Stuart Jenks (ed.), *The Enrolled Customs Accounts (PRO, E356, E372, E364) 1279/80-1508/09 (1523/24) Volume 6: E356/15, E356/16* (List and Index Society 319), London 2007, E356/16 No. 154: Walter Grene submitted 37 *rotuli* and 1 *cedula* to the Exchequer.

given them by the PRO, since there is no way to determine their proper position within the controlment roll.

However, there are two important observations to be made. First, all nine orphan membranes contain imports. That is to say, they must belong to the first 27 membranes of the roll. Second, each of the orphan membranes records indigenous merchants' imports. Therefore, they must all date from the period 29 Sept. 1428 to 4 Apr. 1429. Beyond that, however, no more precise dating is possible.

INDIVIDUAL AND GROUP EXEMPTIONS

The second issue to be dealt with here is the exemptions from tunnage and poundage granted to various persons and groups which are signaled in the controlment roll by the auditor's marginated entry *exoneratur per breve* (or variations thereof).

The first group of exemptions is for wine purchased for consumption in the households of John Tiptoft kt. (ship 48, p. 21), Sir John Radclyf kt. (ship 92, p. 34) and archbishop John Kempe of York (ship 92, p. 34).⁵ The customers did not answer for tunnage on the wine, totalling 41 tuns, imported by these three, as the enrolled account⁶ states, since their wine, having been purchased for consumption in their households (*per ipsos et deputatos suos tam in partibus transmarinis quam in portu predicto pro expensis hospiciorum suorum empta et provisa*), was exempted by warrant of three mandates directed to the customers on 20 Sept. 1429 (Kempe), 18 Nov. 1428 (Tiptoft) and 4 May 1429 (Radclyf), requiring them to permit the imports without claiming customs, subsidy or any other charge on the king's behalf (*absque costumis, subs[idiis] aut aliis deveriis ad opus regis inde capiendis seu solvendis*). Of these three mandates, only Tiptoft's was enrolled.⁷ The submission of these warrants sufficed to convince the auditor: He did not even try to charge the customers for the poundage which would have been due on these wine imports.

The second group of merchants who were exempted from tunnage and poundage were those of Dieppe.⁸ When the customers came in to account, the auditor charged them with £9 17s 10½d for poundage on imports and exports worth £197 17s, as the enrolled account records.⁹ When they appeared before the Exchequer for their final accounting,¹⁰ the customers petitioned for exoneration, referring to

⁵ Although Kempe's name cannot be deciphered in the controlment roll, the marginal annotations – *nichil, quia exoneratur per breve* to the left and *quia exoneratur per breve* to the right – and the amount of wine imported (2 tuns) can be. Since the enrolled customs account records an exemption for 2 tuns of wine imported by Kempe, the identification is beyond doubt.

Henry V's charter for the burgesses and inhabitants of Dieppe,¹¹ which granted them freedom from all customs and subsidies in perpetuity, with the sole exception of staple merchandise and the petty customs charge on wine. Furthermore, they proffered three mandates of Henry VI directed to them, dated 28 Jan., 16 Feb. and 18 Feb. 1429, exempting named merchants of Dieppe and their import cargoes (as well as any goods they might export) from poundage.¹² Since the goods are specified, we can link the mandates to specific ships.

Mandate of 28 Jan. 1429: The king exempts <i>Johannem Despinay, Johannem Fallays, Radulphum de Puyne, Radulphum de Calamond, Thomam Vydien, Robertum Soudan, Martinum Taillour, Johannem de Palet et Galfridum Godard mercatores et habitantes predictae ville nostre de Dieppe ab omnibus custumis et subsidiis nobis debitibus seu solvendis pro triginta et novem lastis et sex barellis allecis albi et sex lastis, duobus cadis et duodecim miliaribus allecis rubei</i>	ship 106, p. 39 (11/13 Jan. 1429): skipper Johannes Despanny de Diep (merchant's name and quantity of salted hering illegible, but valued at £35 15s 6d, equivalent to 11 lasts, 11 barrels) ship 112, p. 41 (14 Jan. 1429): skipper Robert Sodon de Diep (2 lasts <i>allecis albi</i> , 2 cades <i>allecis rubei</i>), Martyn Tayllour (5 lasts <i>allecis albi</i> , 12,000 <i>alleces rubei</i>), Johannes de Palatt (2 lasts <i>allecis albi</i>), Galfridus Godard (1 barrel <i>allecis albi</i>)
16 Feb. 1429: The king exempts <i>Thomam Loutrell mercatorem et habitantem predictae ville nostre de Dieppe ab omnimodis custumis et subsidiis antiquis nobis debitibus pro undecim lastis et novem barellis allecis albi</i>	Ship 119, p. 44 (14 Jan./9 Feb. 1429): Thomas Loutrell (11 lasts, 9 barrels <i>allecis albi</i>)
18 Feb. 1429: The king exempts <i>Willelmum Boulot et Mahiet Harnays mercatores et habitantes predictae ville nostre de Dieppe ab omnimodis custumis et subsidiis antiquis nobis debitibus pro sex lastis allecis albi, duobus lastis allecis rubei, uno hoggeshed et duobus barellis de grano sinapis</i>	no corresponding ship identifiable

For the moment, the Exchequer merely took the matter into consideration, granting the customers a continuation until 27 Jan. 1430. Continuation followed continuation every quarter until 13 Oct. 1433, when the enrolled account breaks off without any explanation.

With that, the customers' obligation to the crown was thrown over to the pipe roll for collection by the London sheriffs. However, nothing was paid, and the pipe roll

¹¹ CPR 1416-22, p. 333 dated 24 July 1420.

¹² TNA: PRO, E383/208, formerly E202/117.

merely documents the continuations year by year.¹³ Finally, in 1437, the customers – complaining of being distrained by the London sheriffs in order to force payment (this was normal procedure) – decided to force the issue. On 8 Feb. 1437, they presented the Exchequer with a supersedeas writ, by which the king ordered the sheriffs to cease distraining the customers' property in order to force payment of the sum still owing from their account (£9 17s 10½d).¹⁴ Rather than reaching a decision immediately, the Exchequer granted the customers two continuations (to 15 Apr. and 10 June 1437) as well as respite from distraint by the sheriffs for the time being.

Finally, on 10 June, both customers presented the Exchequer with mandates from the king dated 27 Mar. (Estfeld)¹⁵ and 18 Apr. 1437 (Walsyngham)¹⁶ embodying patent letters,¹⁷ both dated 27 Mar. 1437 and issued at the special request of the commons in parliament and with the assent of the lords, granting them a blanket amnesty for all offences and debts to the crown before 2 Sept. 1431. With that, the former customers requested judgement, and the Exchequer granted them the desired exoneration. The case was finally closed.

The customers' particulars of account were fiscal documents, forming an integral part of the procedure imposed on the customers when accounting for the crown's customs income before the Exchequer. As such, they were marked up by the auditor when he summed up the crown's income according to the various categories and tariffs. These marginated annotations form an integral part of the source and, in my view of it, deserve to be reproduced in full. I have done this in the following way. First of all, the auditor's summations of income at the end of each page or membrane (including the jottings reproducing the position of the counters on the counting table) have been reproduced as written in the account. Second, all other marginated notes (e.g. a cross or an asterisk indicating an error) are noted in the normal way in the critical apparatus. However, recording the eternally repetitive marginal notes on the tariff categories to which particular products belonged (*panni ind'*, *panni al'*, *panni Hans'*, *per breve* etc.) call for a different solution, since including them in the critical apparatus would simply blimp it up to no useful purpose. Consequently, I have indicated them in the text by employing superscript letters in angle brackets (e.g. <sup>^{A>}De Roberto Derlyngton) and resolving these in a block at the bottom of the page (*Auditor's marginated notations L: <sup>A> panni ind'*).

The problem of the hundredweight is exceedingly vexed. While it is well known that a hundredweight can correspond to 100 lb., 112 lb. or 120 lb. avoirdupois,¹⁸ there is no way to know which of these three values applies when a customer writes *c lb.* or fractions and multiples thereof. Just occasionally, when the particulars of account and the controlment roll have survived, some insight is possible, for instance if one of the two records a particular merchant's exports of pewter vessels as *di' c lb. vasorum stanni* and the other the same goods as *lvj lb. vasorum stanni*.¹⁹ But these cases are far too rare to inspire confident generalizing. Consequently, I have decided to leave the matter unsolved, marking the text in such a way that the reader can easily reconstruct the entry. The most common notation of weight – multiples of 'c' – has not been marked up. Thus 'ij^c lb.' is simply transcribed as 300 lb. If the thousand sign was used, the number is marked with a cross: thus, 'ij M^l lb.' is transcribed as 2000[†] lb. (but xx^c lb. as 2000 lb.) If the sign for one half is used, this is indicated by an asterisk: thus, 'di' c lb.' is transcribed as 50* lb. (but 'l lb.' as 50 lb.) And finally, if the sign for one quarter is used, this is indicated by a double cross: thus, 'c q' lb.' is transcribed as 125[‡] lb.

Diplomatic Notes on the Form of the Edition

The transcriptions of Latin documents in this edition observe the conventions of the *Monumenta Germaniae Historica*. The source texts (and all variants) are reproduced in normal type, while editorial intrusions are printed without exception in italics (e.g. *mardre L3, in error*). Unambiguous abbreviations are expanded silently, without using square brackets or italics to indicate missing letters. u/v and i/j have been regularized silently to accord with pronunciation: thus *vniuersalis* in the source text is rendered *universalis*, while 'i' is transcribed if the letter is pronounced as a vowel (*imperii*), and 'j' if the letter is pronounced as a consonant, i.e. like the 'y' in 'you' (*majestas*), even if the source writes *imperij* and *maiestas*.

Personal names and place names are transcribed exactly as written and only regularized in the Index of People and Places.

Roman numerals are reproduced as Arabic numerals, except for the sovereign's ordinal (*Edwardi ivth*). Arabic numerals which occur in the source texts are indicated by bold type. *ob'* is given as ½d, *q'* as ¼d and *ob' q'* as ¾d.

Following the convention in German, I have used a full stop after a number to indicate the ordinal rather than the cardinal, if a number is not written out. Thus, *27. die Januarii* (p. 147) is to be understood as *vicesimo septimo die Januarii*, rather than *viginti septem die Januarii*.

When transcribing the customs accounts, I have numbered the ships consecutively in italics in square brackets. The individual paragraphs of longer texts have also been numbered in the same way. The reason for this is that the web version of the accounts and accounting materials for the Lancastrian period has no

¹⁸ OED s.v. hundredweight.

¹⁹ Therefore, when transcribing entries regarding the export of pewter vessels, I have retained the hundredweight (e.g. *pro 9 centenis vasorum stanni*).

pagination, since the amount of text displayed on the screen depends on the size of the monitor and its resolution. Consequently, cross references – whether within a single document, from one document to another or in the indices – to 'page thus-and-such' are meaningless, and some internal sub-division of the text which can be linked in is unavoidable. Since some scholars will want to use the printed version of the edition and others the web edition, it is necessary to provide a common basis. Thus, if one scholar refers to ship No. 24 in the digital version of a particular account, those using the printed version will be able to find the vessel in question.

All dates and cross references in the source texts have been resolved in italics in square brackets in the text of the edition, rather than in footnotes.

If both the particulars of account and the controlment roll survive, certain variants have been suppressed to avoid inflating the text-critical apparatus. Thus, neither the substitution of 'y' in one text for 'i' in the other (e.g. Willyamson, Williamson) nor middle English plural variants (-es, -is, -ys etc.) have been noted in the apparatus criticus. In general, I have limited the notation of textual variants to those cases in which the variant spelling of a word changes the pronunciation. Thus, the variant *federbeds* will be noted against *fetherbeds*, but not *fedderbeds* or *federbeddes* against *federbeds*.

Punctuation is artificial and ignores all medieval full stops, commas and so forth. Since Latin is a syntactic language (like German), the eminently useful MGH convention – namely to employ punctuation (according to the pre-reform German rules) to mark up the grammatical structure of the sentence – has been employed here. I have also broken up the stylistically elegant, but utterly incomprehensible run-on Latin sentences of the source texts into manageable units.

Since we are dealing with late medieval administrative Latin, there are some cases which call for local by-laws.

First of all, there are a number of middle English words embedded in the Latin texts which have to be assigned a gender, since they are often modified by an abbreviated adjective (e.g. *pro 1 parv' fetherbed*). Since the adjectives are written out in a number of instances (*pro 1 parvo fetherbed*), I have arbitrarily imposed a masculine grammatical gender on all middle English words rather than litter the edition with apostrophes.

Second, the sources themselves are in a muddle as to whether the words *custuma* and *subsidiium* are singular or plural, and usually avoid the problem by writing *cust'* and *subs'*. If a scribe does write out the one or the other word, it is almost inevitable that he will contradict himself, writing *custuma* in one line and *custume* a few lines later. This muddle is not merely the result of scribal carelessness or low standards of Latinity. In the fifteenth century, it was possible to differentiate between the collective noun (in the singular) denoting the charges to be paid and the individual sums (in the plural) which each merchant rendered. Even bearing this in mind, however, scribes are simply not consistent. Taking each individual text as a whole, I have done my best to reproduce what the scribe seemed to be thinking.

I
TUNNAGE AND POUNDAGE
CONTROLMENT ROLL
29 SEPT. 1428 – 29 SEPT. 1429

Controlment roll of Walter Grene for the issues of tunnage and poundage in the period from 29 Sept. 1428 to 29 Sept. 1429

L TNA: PRO, PRO, E122/74/11. Original controlment roll bound in Exchequer style. Parchment. unsealed. Contemporaneous numbering of the membranes: Imports to Easter: m 1 not numbered, m 2 no number visible (there is a hole in parchment where it should have been), rotulo 3 (m 3), rotulo 4^{to} (m 4), rotulo 5^{to} (m 5), rotulo 6^{to} (m 6), rotulo 7^o (m 7), rotulo 8^o (m 8), rotulo 9^o (m 9), rotulo 10^o (m 10), rotulo 11 (m 11), rotulo 12 (m 12), rotulo 13 (m 13), rotulo 14^o (m 14), rotulo 15 (m 15), rotulo 16 (m 16), rotulo 17 (m 17), rotulo 18 (m 18); Imports after Easter: m 19 not numbered, rotulo 2 (m 20), rotulo 3 (m 21), rotulo 4 (m 22), rotulo 5^{to} (m 23), rotulo 6^{to} (m 24), rotulo 7^o (m 25), rotulo 8^o (m 26), rotulo 9^o (m 27); Exports to Easter: m 28 is not numbered, rotulo 2^o (m 29), rotulo 3 (m 30), rotulo 4^{to} (m 31), Rotulus 5^{lus} (m 32), no number visible on m 33, Rotulo 7 (m 34); Exports after Easter: m 35 is not numbered, rotulo 2^o (m 36), ro[tulo] 3^o (m 37), rotulo 4^{to} (m 38). The account is in parlous shape, having rotted from the bottom when rolled up, so that a small wedge of parchment is missing at the top left of the recto side of the membrane and a larger wedge in the middle. The third wedge was large enough that the bottom of each membrane has completely rotted away from its parent. Eleven bottoms¹ of the original 37 full membranes (m 38 is a short cedula)² have not survived, and when the account was restored in the PRO, the order of the remaining 26 membranes was not maintained. I have restored those membrane bottoms whose original position in the account could be determined beyond doubt (e.g. by the date given for a ship) to their proper position, but this has not always proved possible.

III PETTY CUSTOMS PARTICULARS OF ACCOUNT 29 SEPT. 1429-29 SEPT. 1430

Particulars of account of John Holym and Hugh Dyke for the issues of the petty customs (exports only) in London during the period from 29 Sept. 1429 to 29 Sept. 1430

L TNA: PRO, E122/161/11. Original particulars of account bound in Exchequer style (11 membranes; only the export portion of the account is transmitted). Parchment. Unsealed. The membranes recording exports before Easter (m 1-6) and after Easter (m 7-11) were initially bound separately and subsequently sewn together with a parchment tag. Contemporaneous numbering of the membranes: m 1 not numbered (but London'; Parva custuma a festo Michaelis anno 8° is entered in the apex); 2^{us} rotulus (m 2); 3^{us} rotulus (m 3); 4^{us} rotulus (m 4); m 5 not numbered (but Post festum Natalis Domini anno 8° is entered in the apex); 6^{us} rotulus (m 6); primus (m 7); 2^{us} rotulus (m 8); 3^{us} (m 9); 4^{us} (m 10); m 11 not numbered. Some damage from damp (especially at the margins of the membranes), holes in parchment from m 3 onwards.

INDEX OF PEOPLE AND PLACES

In accordance with current usage, the first names of Englishmen and -women have been standardized to their current forms. Thus Willelmus in the accounts is indexed as William and so forth. Italian and Spanish first names are given in the 'ab-lative' (Andrea, Beaceo, Roderigo rather than Andreas, Beaceus, Roderigus). The first names of other foreigners, who are largely Dutch and German, are normally indexed in something approaching their modern forms, e.g. Johannes, Jacob, Her-man, Hugo rather than Hugh (which would indicate an Englishman). However, it is not possible to be entirely consistent. Take, as an example, Willelmus. Is one to index Hanseatic merchants as Wilhelm, but Dutch merchants and shippers as Wil-lem or Wim and the Dinanters as Guillaume? To do so would simply be to intro-duce incredible confusion, entirely leaving aside the intractable problem of distin-guishing between merchants of Dutch and Hanseatic origin. Therefore, in a number of cases I have indexed Dutch and German merchants' first names in the current English form: e.g. Paul, William, Laurence, Andrew, Henry.

Family names have been grouped, where possible, in the index, with cross refer-ences leading the reader from the variants to the main entry, which records all vari-ant spellings in parentheses. However, given the inconsistency of the customers' scribes, I have found it impossible to resolve all doubts and have therefore tried to steer a middle course between the splitters and the lumpers. There are cases where there can be no doubt that divergent spellings denote one and the same merchant. On the other hand, there are cases where I am all but certain that variant spellings denote one person, yet am troubled by nagging doubts. In these cases I record the names separately and referred back and forth ('see also N.N.').

The order of the family names in the index is phonological, so that, for instance, 'y' is alphabetized as 'i'.

Place names are in small capitals.

INDEX OF SUBJECTS

The index is structured so as to serve as a glossary. Hence, the main entry is under the word as it appears in the sources (*zinziber*), and a cross-reference leads the reader from the modern English term to the main entry (ginger see *zinziber*). If a term is in Middle English, the plural form is also given (e.g. *alle hafte*, -s); if in Latin, the genitive (e.g. *allec*, *ecis*). More than one reference per page is not noted.
