INTRODUCTION

This is the seventh volume of the Lancaster series (Part II) of the edition of the London customs accounts (TNA: PRO E122). It is comprised of the surviving accounts for a single year (1439/40), to wit 1) the petty customs particulars of account and controlment roll for exports, 2) the petty customs controlment roll for imports (for the period 10 May to 29 Sept. 1440 only) and 3) the wool customs and subsidy controlment roll.

Everything the reader needs to understand about the English customs system – and the peculiarities of the customs administration in London – has been detailed in the introduction to the pilot volume.¹ There are, however, some minor issues which need to be dealt with.

WORSTEDS

Exports of worsteds occasionally caused confusion among those charged with collecting the petty customs. These cloths were, in theory, subject both to the ad valorem petty customs (3d/£), introduced in 1303, and the cloth customs, imposed in 1347 and calculated by piece. However, Hanseatic merchants had successfully contested being subjected to the cloth customs, since they violated Edward II's guarantee that, by virtue of his privilege issued on 7 Dec. 1317,² they would not be subject to 'new charges' on their merchandise. Consequently, there were three differing customs rates on worsteds, depending on the status of the exporting merchant.

Customs charges imposed on exports of single and double worsteds			
	indigenous	aliens	Hansards
single worsteds			
petty customs	(exempt)	3d/£	3d/£
cloth customs	1d/piece ³	1½d/piece	(exempt)
double worsteds			
petty customs	(exempt)	3d/£	3d/£
cloth customs	2d/piece	3d/piece	(exempt)

In our petty customs export account, the customers avoided confusion by making separate entries for the ad valorem petty customs charge and the per piece cloth

customs levy on worsteds of both sorts. Hence, indigenous worsted exports were charged only by the piece, Hansards were charged only on the value of the cloth (but not per piece) and all other aliens were charged both by the piece and on the value of the worsteds they exported. However, in our account the auditor queried several entries where the customers had not charged cloth customs on exports of worsteds. Since this was only justified if the merchant in question was Hanseatic, the auditor entered a cross in the left-hand margin in order to signal a possible error, one which would have to be investigated more thoroughly in the course of the audit.⁴ However, he did not proceed with any great consistency, as the table shows. Although all queried worsted entries related to Hanseatic merchants (right-hand column), a number of Hanseatic worsted exports were not queried (left-hand column). Worse yet, six Hanseatic merchants' exports were both queried and not queried, so that the names appear in both columns. This would seem to indicate an appreciable degree of confusion on the auditor's part.

So what is the explanation? We cannot charge the auditor's confusion off to inexperience. While it is true that William Proctor, the auditor of the London petty customs account for 1439/40, had only been in office for a comparatively short time,⁵ he had had time to gather a certain amount of experience by the time he came to mark up the London account in Michaelmas term 1440.⁶ Nor will the

⁴ Once the matter was cleared up, the auditor x-ed the cross through, so that it looked like an eight-armed asterisk (which is how, for the sake of brevity, I have recorded it in the apparatus criticus).

⁵ He had been appointed on 23 Oct. 1438 (J.C. Sainty, *Officers of the Exchequer* (List & Index Society, Special Series 18), London 1983, p. 117).

⁶ His first task as auditor of customs accounts was the analysis of the Exeter-Dartmouth account for 1437/8 in Michaelmas term 1438: Stuart Jenks (ed.), *The Enrolled Customs*

assumption of incompetence suffice as an explanation. After all, Proctor went on to serve just shy of 25 years as auditor (from 1438 to 1463).⁷ This would seem implausible if he had been unfit for his official duties from the beginning.

Nor do the enrolled accounts shed any light on the matter, at least at first glance.⁸ They merely state laconically that the customers accounted for Hanseatic cloth exports at the rates agreed in the *Carta mercatoria* (1303) between the crown and the foreign merchants and cite Henry VI's mandate to the Exchequer of 8 Dec. 1437 as warrant.⁹ That mandate goes some ways to clearing up the matter. It begins by reciting the terms of the *Carta mercatoria*¹⁰ and Edward II's grant to the Hanse of 1317,¹¹ and then turns to the Treaty of London (1437),¹² which among other things guaranteed the Hanse freedom from any 'new charges' whatsoever on their merchandise. Henry VI's mandate then notes that the king had directed the customers 'in certain ports in England' to charge the Hansards no more than the rates set down in the *Carta mercatoria* on their cloth exports. It closes by ordering the Exchequer to demand no more than these rates from the customers when they accounted.

Since the *Carta mercatoria* had envisaged no charges on worsteds - these were only introduced in 1347 as part of the cloth customs and consequently fell under the 'new charges' from which the Treaty of London had declared Hanseatic merchants exempt - the case would seem to be clear: Hanseatic exports of worsteds were only to be charged petty customs ad valorem (3d/£). However, things were not that simple. In the years following the ratification of the Treaty of London, Hanseatic merchants repeatedly complained of harassment by the customers in England,¹³ who were clearly favoring English merchants in the rush to garner as much trade as possible, once the mutual blockade (1434-37) had been lifted.

What rescued the Hanseatic merchants from the machinations of the customers was the pan-European famine which broke out in the autumn of 1437 and lasted until the harvest of 1440. Already on 28 Nov. 1437 Henry VI requested the High Master of the Teutonic Order, Paul von Rußdorf, in view of the current famine in England, to allow grain to be exported from Prussia to England.¹⁴ Given that this

⁸ There are two enrolled accounts, the first running to 10 May 1440, the other covering the remainder of the Exchequer year: Jenks, *Enrolled Customs Accounts*, vol. 8, No. 36-37. This was occasioned by the appointment of William Lunes to replace John Norman as customer: *CFR 1437-45*, p. 112.

letter was sent off just 10 days before Henry VI's mandate to the Exchequer (8 Dec. 1437), it is plain that the mandate (and the corresponding orders sent to the customers) was a quid pro quo. Focussed as the mandate was on cloth, the conclusion seems inescapable that charging cloth customs on Hanseatic exports of worsteds was part of the customers' campaign of harassment.

So Proctor was not confused at all. Marking up Hanseatic worsted exports was more likely than not to have been part of a strategy designed to put pressure on Prussia to ratify the Treaty of London.¹⁵ The Prussians were loathe to do so, since developments had shown them what ratification would mean: a continuance of the crushing English dominance of Anglo-Prussian trade. Prussia temporized, complained about the English (both at home and in Prussia itself), but finally seized on English desperation for grain imports as a method of wriggling out of the Treaty.¹⁶ The English crown had no direct answer for this.¹⁷ However, if we look at Table 1, we can glimpse something of its frankly devious tactics. All of the merchants whose worsted exports were queried came from Cologne. Querying their worsted exports might well have been envisaged to serve as a way of reminding them that if the Treaty of London was not ratified by the Prussians, it would be null and void. That, in turn, would mean that the abolishment of all 'new charges' - defined in the Treaty as those not more than 100 years old - would also be null and void. Since the crown had only begun to collect cloth customs from 1347, Cologners would be free of cloth customs on their worsteds only if the Treaty were ratified. If the crown decided to regard the Prussian refusal to ratify as grounds for abrogating the Anglo-Hanseatic Treaty altogether, then Cologners' exports of worsteds would be subject to cloth customs. The crown's goal was, if this reconstruction of its tactics is correct, to induce the Cologners to put pressure on Prussia to ratify the Treaty.

WOOL

Let the reader be advised in passing that a certain amount of wool was exported free of subsidy during this year by royal licence, namely 187½ sacks, 4 cloves and 700 woolfells (exported to Calais by Hugh Dyke) and 64½ sacks, 9½ cloves (exported to Italy by Robert lord Willoughby and Reginald lord de la Warr through their deputy William Cantelowe). Since the surviving account is a controlment roll, it does not distinguish between shipments of staple goods subject to the wool

¹⁵ The Hanseatic Diet, meeting in Lübeck, had ratified the Treaty on 20 Aug. 1437: *Hanserecesse* II 2, No. 86, p. 88.

¹⁶ On these matters, see Jenks, *England*, p. 623-31. On 13 Dec. 1437, the London Counter directly linked famine relief in England and Anglo-Hanseatic politics: GStA PK, OBA 7394, calendared in *Hansisches Urkundenbuch* 7/1, No. 320, p. 156-7

¹⁷ After all, England desperately needed Prussian grain, and abrogating the Treaty altogether would mean that English merchants trading with Prussia would no longer be able to claim their rights under the Treaty.

subsidy and those which were not. Therefore, the details of these royal licences are immaterial for the reader's understanding of the account.¹⁸

The customers' particulars of account were fiscal documents, forming an integral part of the procedure imposed on the customers when accounting for the crown's customs income before the Exchequer. As such, they were marked up by the auditor when he summed up the crown's income according to the various categories and tariffs. These margined annotations form an integral part of the source and, in my view of it, deserve to be reproduced in full. I have done this in the following way. First of all, the auditor's summations of income at the end of each page or membrane (including the jottings reproducing the position of the counters on the counting table) have been reproduced as written in the account. Second, all other margined notes (e.g. a cross or an asterisk indicating an error) are noted in the normal way in the critical apparatus. However, recording the eternally repetitive marginal notes on the tariff categories to which particular products belonged (*panni ind'*, *panni al'*, *panni Hans'*, *per breve* etc.) call for a different solution, since including them in the critical apparatus would simply blimp it up to no useful purpose. Consequently, I have indicated them in the text by employing superscript letters in angle brackets (e.g. ^{<A>}De Roberto Derlyngton) and resolving these in a block at the bottom of the page (*Auditor's margined notations L: <A> panni ind'*).

The problem of the hundredweight is exceedingly vexed. While it is well known that a hundredweight can correspond to 100 lb., 112 lb. or 120 lb. avoirdupois,¹⁹ there is no way to know which of these three values applies when a customer writes *c lb.* or fractions and multiples thereof. Just occasionally, when the particulars of account and the controlment roll have survived, some insight is possible, for instance if one of the two records a particular merchant's exports of pewter vessels as *di' c lb. vasorum stanni* and the other the same goods as *lvj lb. vasorum stanni*.²⁰ But these cases are far too rare to inspire confident generalizing. Consequently, I have decided to leave the matter unsolved, marking the text in such a way that the reader can easily reconstruct the entry. The most common notation of weight – multiples of 'c' – has not been marked up. Thus *iiij^c lb.* is simply transcribed as 300 lb. If the thousand sign was used, the number is marked with a cross: thus, *ij M[†] lb.* is transcribed as 2000[†] lb. (but *xx^c lb.* as 2000 lb.) If the sign for one half is used, this is indicated by an asterisk: thus, *di' c lb.* is transcribed as 50* lb. (but *l lb.* as 50 lb.) And finally, if the sign for one quarter is used, this is indicated by a double cross: thus, *c q' lb.* is transcribed as 125[‡] lb.

¹⁸ The details (and all of the paperwork) can be found in the web version: A 4 § 4 (Dyke), § 5-6, 11 (Willoughby and Ware).

¹⁹ OED s.v. hundredweight.

²⁰ Therefore, when transcribing entries regarding the export of pewter vessels, I have retained the hundredweight (e.g. *pro 9 centenis vasorum stanni*).

Diplomatic Notes on the Form of the Edition

The transcriptions of Latin documents in this edition observe the conventions of the *Monumenta Germaniae Historica*. The source texts (and all variants) are reproduced in normal type, while editorial intrusions are printed without exception in italics (e.g. *mardre L3, in error*). Unambiguous abbreviations are expanded silently, without using square brackets or italics to indicate missing letters. u/v and i/j have been regularized silently to accord with pronunciation: thus *vniuersalis* in the source text is rendered *universalis*, while ‘i’ is transcribed if the letter is pronounced as a vowel (*imperii*), and ‘j’ if the letter is pronounced as a consonant, i.e. like the ‘y’ in ‘you’ (*majestas*), even if the source writes *imperij* and *maiestas*.

Personal names and place names are transcribed exactly as written and only regularized in the Index of People and Places.

Roman numerals are reproduced as Arabic numerals, except for the sovereign’s ordinal (*Edwardi ivth*). Arabic numerals which occur in the source texts are indicated by bold type. *ob’* is given as ½d, *q’* as ¼d and *ob’ q’* as ¾d.

Following the convention in German, I have used a full stop after a number to indicate the ordinal rather than the cardinal, if a number is not written out. Thus, *27. die Januarii* (p. 147) is to be understood as *vicesimo septimo die Januarii*, rather than *viginti septem die Januarii*.

When transcribing the customs accounts, I have numbered the ships consecutively in italics in square brackets. The individual paragraphs of longer texts have also been numbered in the same way. The reason for this is that the web version of the accounts and accounting materials for the Lancastrian period has no pagination, since the amount of text displayed on the screen depends on the size of the monitor and its resolution. Consequently, cross references – whether within a single document, from one document to another or in the indices – to ‘page thus-and-such’ are meaningless, and some internal sub-division of the text which can be linked in is unavoidable. Since some scholars will want to use the printed version of the edition and others the web edition, it is necessary to provide a common basis. Thus, if one scholar refers to ship No. 24 in the digital version of a particular account, those using the printed version will be able to find the vessel in question.

All dates and cross references in the source texts have been resolved in italics in square brackets in the text of the edition, rather than in footnotes.

If both the particulars of account and the controlment roll survive, certain variants have been suppressed to avoid inflating the text-critical apparatus. Thus, neither the substitution of ‘y’ in one text for ‘i’ in the other (e.g. *Willyamson, Williamson*) nor middle English plural variants (-es, -is, -ys etc.) have been noted in the apparatus criticus. In general, I have limited the notation of textual variants to those cases in which the variant spelling of a word changes the pronunciation. Thus, the variant *federbeds* will be noted against *fetherbeds*, but not *fedderbeds* or *federbedes* against *federbeds*.

Punctuation is artificial and ignores all medieval full stops, commas and so forth. Since Latin is a syntactic language (like German), the eminently useful MGH convention – namely to employ punctuation (according to the pre-reform German

rules) to mark up the grammatical structure of the sentence – has been employed here. I have also broken up the stylistically elegant, but utterly incomprehensible run-on Latin sentences of the source texts into manageable units.

Since we are dealing with late medieval administrative Latin, there are some cases which call for local by-laws.

First of all, there are a number of middle English words embedded in the Latin texts which have to be assigned a gender, since they are often modified by an abbreviated adjective (e.g. *pro 1 parv' fetherbed*). Since the adjectives are written out in a number of instances (*pro 1 parvo fetherbed*), I have arbitrarily imposed a masculine grammatical gender on all middle English words rather than litter the edition with apostrophes.

Second, the sources themselves are in a muddle as to whether the words *custuma* and *subsidiium* are singular or plural, and usually avoid the problem by writing *cust'* and *subs'*. If a scribe does write out the one or the other word, it is almost inevitable that he will contradict himself, writing *custuma* in one line and *custume* a few lines later. This muddle is not merely the result of scribal carelessness or low standards of Latinity. In the fifteenth century, it was possible to differentiate between the collective noun (in the singular) denoting the charges to be paid and the individual sums (in the plural) which each merchant rendered. Even bearing this in mind, however, scribes are simply not consistent. Taking each individual text as a whole, I have done my best to reproduce what the scribe seemed to be thinking.

CONTROLMENT ROLL
(EXPORTS AND IMPORTS)
10 MAY – 29 SEPT. 1440

Particulars of account (exports only) of Thomas Chynnore and John Norman for the issues of the petty customs during the accounting period from 29 Sept. 1439 to 29 Sept. 1440 and controlment roll (exports and imports) of the controller John Cotford for the accounting period from 10 May to 29 Sept. 1440

L1 TNA: PRO, E122/203/2. Original particulars of account (exports) bound as a codex (48 folios, of which ff. 45-48 are blank; quire structure: VIII¹⁶ + VIII³² + VIII⁴⁸). Parchment. Unsealed. Contemporaneous numbering of the folios in Roman numerals in the lower right-hand corner of the recto side of the folio. The auditor has entered a dot (a) above each merchant's customs charge and (b) above the sum of the issues of the petty customs at the bottom of each page. Massive damage from damp (significant portions of individual folios have rotted away).

L2 PRO, TNA: E122/76/38. Original controlment roll (imports and exports from 10 May to 29 Sept. 1440) bound in Exchequer style (7 membranes; contemporaneously numbered in Roman numerals in the apex of the membrane (hence hidden in the stitching): exports: 4 (m 1), 5^{us} (m 2) – one membrane is missing between m 2 and m 3 – 7^{us} (m 3), 8 (m 4); imports: 2 (m 5), 3 (m 6), 4 (m 7, inverted, at the bottom)). Parchment. Unsealed. Some damage from damp, holes in the parchment from m 2 onwards; the upper and lower right-hand corners of m 4 have rotted away.

The basis of this edition is, of course, the particulars of account, to which variants from the controlment roll have been added from 10 May to 29 Sept. 1440 (ships No. 118 to 181). Since no particulars of account recording imports have survived, the import section of the controlment roll has been added on to the end of the account (from ship No. 182 onwards). However, lest the order of L1 – which includes the summa totalis of exports and imports for the period 10 May

to 29 Sept. 1440 on f. 44^v – be disturbed, I have placed the import section of the controlment roll after it.

INDEX OF PEOPLE AND PLACES

In accordance with current usage, the first names of Englishmen and -women have been standardized to their current forms. Thus Willelmus in the accounts is indexed as William and so forth. Italian and Spanish first names are given in the 'ablative' (Andrea, Beaceo, Roderigo rather than Andreas, Beaceus, Roderigus). The first names of other foreigners, who are largely Dutch and German, are normally indexed in something approaching their modern forms, e.g. Johannes, Jacob, Herman, Hugo rather than Hugh (which would indicate an Englishman). However, it is not possible to be entirely consistent. Take, as an example, Willelmus. Is one to index Hanseatic merchants as Wilhelm, but Dutch merchants and shippers as Willem or Wim and the Dinanters as Guillaume? To do so would simply be to introduce incredible confusion, entirely leaving aside the intractable problem of distinguishing between merchants of Dutch and Hanseatic origin. Therefore, in a number of cases I have indexed Dutch and German merchants' first names in the current English form: e.g. Paul, William, Laurence, Andrew, Henry.

Family names have been grouped, where possible, in the index, with cross references leading the reader from the variants to the main entry, which records all variant spellings in parentheses. However, given the inconsistency of the customers' scribes, I have found it impossible to resolve all doubts and have therefore tried to steer a middle course between the splitters and the lumpers. There are cases where there can be no doubt that divergent spellings denote one and the same merchant. On the other hand, there are cases where I am all but certain that variant spellings denote one person, yet am troubled by nagging doubts. In these cases I record the names separately and referred back and forth ('see also N.N.').

The order of the family names in the index is phonological, so that, for instance, 'y' is alphabetized as 'i'.

Place names are in small capitals.

INDEX OF SUBJECTS

The index is structured so as to serve as a glossary. Hence, the main entry is under the word as it appears in the sources (*zinziber*), and a cross-reference leads the reader from the modern English term to the main entry (ginger see *zinziber*). If a term is in Middle English, the plural form is also given (e.g. *alle hafte*, -s); if in Latin, the genitive (e.g. *allec*, *ecis*). More than one reference per page is not noted.
