INTRODUCTION

This is the first volume of the Tudor series (Part IV) of the edition of the London customs accounts (TNA: PRO E122). It is comprised of the wool customs and subsidy and the tunnage and poundage accounts for 1487/88 and the wool account for 1489/90.

Everything the reader needs to understand about the English customs system – and the peculiarities of the customs administration in London – has been detailed in the introduction to the pilot edition.¹

The first thing that is slightly out of the ordinary in Henry VII's early years is that the tunnage and poundage controlment roll for 1487/88 designates Spanish merchants as such – *De N.N., Hisp', pro ...* – and not, as hitherto customary, simply as undifferentiated aliens (*De N.N., alienigena, pro ...*). The reason for this is Edward IV's treaty of perpetual alliance with king Henry IV of Castille and Léon, confirmed by the English monarch on 6 August 1466² and re-confirmed on 9 May 1475 shortly after Ferdinand's accession to the throne in 1474.³ Among other things, the treaty of 1466 and its successors mandated that the subjects of king Henry IV's and his successors were to be charged tunnage and poundage at indigenous rates, that is to say (1) 3s/tun of sweet wine (rather than the alien rate of 6s); 2) 1s/£ on exports of tin and pewter vessels (rather than at the alien rate of 2s); and (3) their cloth exports were free of poundage (rather than being subject to a 5% *ad valorem* duty). The commercial clauses of the treaty continued to be honored by Richard III and Henry VII, until they were abrogated by the Treaty of Medina del Campo (1489),⁴ the exemption of Spanish merchants from alien rates of customs and subsidy remaining valid to 17 August 1489,⁵ after which they were reduced to the status of all other aliens.⁶ Up to this point in time, the customs administration –

⁵ The tunnage and poundage account for the following year, 1488/89 (TNA: PRO, E356/23 m 37) states the cut-off date explicitly and cites TNA: PRO, E368/260 Status et visus compotorum Michaelmas m 8 as the authority for the Spaniards' exemption up to that date.

⁶ Note that Hanseatic merchants enjoyed a unique status and did not belong to the category of 'other aliens' such as Italians, Dutch and Spaniards.

including those responsible for collecting tunnage and poundage in London in 1487/88 – had to indicate the Spaniards' unique status in all accounts in order to avoid being held liable for the higher rates of customs and subsidy due from aliens by the Exchequer.

Two other foreign merchants enjoyed exemption from tunnage and poundage in 1487/88 by authority of patents which Henry VII had granted them, irrespective of whether they traded with England themselves or through indigenous or alien factors. In the margin of each entry in our tunnage and poundage account which recorded the shipment of goods under these patents, the auditor entered *per breve* in the margin of the controlment roll, since the patent served as the beneficiaries' warrant for freedom from customs and subsidy and, subsequently, as the basis of the customers' petition for exoneration.

The first of these beneficiaries was a servant of the duke of Brittany, one Francis Dupon (or Dupon), whose alien factors exported goods worth £1038 from London during the customers' accounting period 1487/88. Although these goods were free of customs and subsidy by authority of Henry VII's patent of 3 July 3 Hen. VII/1488, the auditor initially charged the customers a total of £51 18s for poundage at 12d/£, as the enrolled account records.⁷ However, at their final accounting in Hilary term, 1489, the customers petitioned for exoneration from this charge, citing 1) the king's patent, which had licensed Dupon to import and export goods (other than staple merchandise) via London, retaining the customs and subsidies up to the amount of £100;⁸ 2) the corresponding *breve de allocate* directed to the Exchequer;⁹ 3) the corresponding *breve de liberate* directed to the customers on 3 July 3 Hen. VII/1488; and 4) the indenture between the tunnage and poundage customers and Dupon's factor Laurencius Bonevyse dated 12 Oct. 4 Hen. VII/1488,¹⁰ which stated that Bonevyse, acting for Dupon, had retained the poundage charges (£51 18s) due on Dupon's exports through his alien factors between the date of issue of king's patent and the following Michaelmas (3 July to 29 September 1488), which amounted to £1038. The Exchequer accepted the customers' arguments and exonerated them for the corresponding amount in their account for 1487/88.

The second beneficiaries were three merchants from Bilbao – John Saunches Darys, his son John Darys and John Delybary (or Dolybary) – to whom the king

⁸ As the final accounting (TNA: PRO, E368/262 Status et visus compotorum m 2) states, this patent, although not entered on the patent rolls, was transcribed in the King's Remembrancer's Memoranda Rolls: TNA: PRO, E159/264 Recorda Trinity m 9. See Appendix, No. I.1.

⁹ TNA: PRO, E159/265 Brevia directa baronibus Hilary m 5d (Appendix I.2). The enrolled account states erroneously that this writ was transcribed in the Brevia directa baronibus Michaelmas. Such cross-references errors are extremely rare.

owed £1200¹¹ and which he was repaying by licensing them and/or their factors (who were required to be subjects of the king of Castille and León) to retain the customs and subsidies due on their imports and exports of any merchandise whatsoever – in particular exports of cloth, tin and lead and imports of woad, wine, iron and oil – up to that amount, as mandated in the king's patent dated 15 July 1 Hen. VII/1486.¹² In 1487/88, these three merchants and their factors imported and exported merchandise via London worth a total of £6705 5s –for which the auditor charged the customers with poundage totalling £335 5s 3d at 12d/£ – and imported 3½ tuns of sweet wine and 168 tuns, 3 *roundelettes* (equivalent to ⅜ of a tun) of non-sweet wine, for which the auditor charged the customers with tunnage totalling £25 15s 7½d at 3s/tun, both sweet and non-sweet wine being charged at the indigenous rate, since the beneficiaries and their factors were subjects of king Ferdinand of Castille and León. At their final accounting in Hilary term, 1489, the customers petitioned for exoneration from this charge, citing 1) the king's patent, 2) the corresponding *breve de liberate* dated 15 July 1 Hen. VII/1486 directed to the customers themselves, 3) the corresponding *breve de allocate* directed to the Exchequer¹³ and 4) the indenture drawn up on 1 October 4 Hen. VII/1488 between John Darys, the son of John Saunches Darys, and the customers themselves,¹⁴ which stated that the three beneficiaries had retained the poundage charges (£335 5s 3d) due on their imports and exports via London through their Spanish factors amounting to £6705 5s, and the tunnage charges (£25 17s 7½d) due on imports of 3½ tuns of sweet wine and 168 tuns, 3 *roundelettes* (⅜ of a tun) of non-sweet wine, between Michaelmas 1487 and Michaelmas 1488. The Exchequer accepted the customers' arguments and exonerated them for the corresponding amount in their account for 1487/88.

The customers' particulars of account were fiscal documents, forming an integral part of the procedure imposed on the customers when accounting for the crown's customs income before the Exchequer. As such, they were marked up by the auditor when he summed up the crown's income according to the various categories and tariffs. These marginated annotations form an integral part of the source and, in my view of it, deserve to be reproduced in full. I have done this in the following way. First of all, the auditor's summations of income at the end of each page or membrane (including the jottings reproducing the position of the

¹¹ The sources cited here state repeatedly that this sum was the equivalent of 6000 gold crowns (*corona auri*). This is probably the French écu à la couronne.

As the final accounting (TNA: PRO, E368/262 Status et visus compotorum m 2) states, this patent, although not entered on the patent rolls, was transcribed in the King's Remembrancer's Memoranda Rolls: TNA: PRO, E159/262 Recorda Trinity m 9. counters on the counting table) have been reproduced as written in the account. Second, all other marginated notes (e.g. a cross or an asterisk indicating an error) are noted in the normal way in the critical apparatus. However, recording the eternally repetitive marginal notes on the tariff categories to which particular products belonged (*panni ind'*, *panni al'*, *panni Hans'*, *per breve* etc.) call for a different solution, since including them in the critical apparatus would simply blimp it up to no useful purpose. Consequently, I have indicated them in the text by employing superscript letters in angle brackets (e.g. <sup><sup>De Roberto Derlyngton) and resolving these in a block at the bottom of the page (*Auditor's marginated notations L: <sup><sup>panni ind'*).

The problem of the hundredweight is exceedingly vexed. While it is well known that a hundredweight can correspond to 100 lb., 112 lb. or 120 lb. avoirdupois,¹⁵ there is no way to know which of these three values applies when a customer writes *c lb.* or fractions and multiples thereof. Just occasionally, when the particulars of account and the controlment roll have survived, some insight is possible, for instance if one of the two records a particular merchant's exports of pewter vessels as *di' c lb. vasorum stanni* and the other the same goods as *lvj lb. vasorum stanni*.¹⁶ But these cases are far too rare to inspire confident generalizing. Consequently, I have decided to leave the matter unsolved, marking the text in such a way that the reader can easily reconstruct the entry. The most common notation of weight – multiples of 'c' – has not been marked up. Thus 'ij^c lb.' is simply transcribed as 300 lb. If the thousand sign was used, the number is marked with a cross: thus, 'ij M[†] lb.' is transcribed as 2000[†] lb. (but xx^c lb. as 2000 lb.) If the sign for one half is used, this is indicated by an asterisk: thus, 'di' c lb.' is transcribed as 50* lb. (but 'l lb.' as 50 lb.) And finally, if the sign for one quarter is used, this is indicated by a double cross: thus, 'c q' lb.' is transcribed as 125[‡] lb.

Finally, let it be stated, particularly to those in beatific possession of a fund of such recondite and encyclopedic knowledge as to include *Only Fools and Horses*, that 'Benedict Trotter' (p. 32 et passim) is not my little joke at the expense of the academic community. The gentleman really did exist,¹⁷ and he was, indubitably, an international trader. I have, alas, not been able to determine if he was originally from Peckham, but if I do, you'll learn about it in the *TLS* in jig time.

¹⁵ OED s.v. hundredweight.

¹⁶ Therefore, when transcribing entries regarding the export of pewter vessels, I have retained the hundredweight (e.g. *pro 9 centenis vasorum stanni*).

Diplomatic Notes on the Form of the Edition

The transcriptions of Latin documents in this edition observe the conventions of the *Monumenta Germaniae Historica*. The source texts (and all variants) are reproduced in normal type, while editorial intrusions are printed without exception in italics (e.g. mardre *L3*, *in error*). Unambiguous abbreviations are expanded silently, without using square brackets or italics to indicate missing letters. u/v and i/j have been regularized silently to accord with pronunciation: thus *vniuersalis* in the source text is rendered *universalis*, while 'i' is transcribed if the letter is pronounced as a vowel (*imperii*), and 'j' if the letter is pronounced as a consonant, i.e. like the 'y' in 'you' (*majestas*), even if the source writes *imperij* and *maiestas*.

Personal names and place names are transcribed exactly as written and only regularized in the Index of People and Places.

Roman numerals are reproduced as Arabic numerals, except for the sovereign's ordinal (*Edwardi ivth*). Arabic numerals which occur in the source texts are indicated by bold type. *ob'* is given as $\frac{1}{2}d$, *q'* as $\frac{1}{4}d$ and *ob' q'* as $\frac{3}{4}d$.

Following the convention in German, I have used a full stop after a number to indicate the ordinal rather than the cardinal, if a number is not written out. Thus, *27. die Januarii* (p. 147) is to be understood as *vicesimo septimo die Januarii*, rather than *viginti septem die Januarii*.

When transcribing the customs accounts, I have numbered the ships consecutively in italics in square brackets. The individual paragraphs of longer texts have also been numbered in the same way. The reason for this is that the web version of the accounts and accounting materials for the Lancastrian period has no pagination, since the amount of text displayed on the screen depends on the size of the monitor and its resolution. Consequently, cross references – whether within a single document, from one document to another or in the indices – to 'page thus-and-such' are meaningless, and some internal sub-division of the text which can be linked in is unavoidable. Since some scholars will want to use the printed version of the edition and others the web edition, it is necessary to provide a common basis. Thus, if one scholar refers to ship No. 24 in the digital version of a particular account, those using the printed version will be able to find the vessel in question.

All dates and cross references in the source texts have been resolved in italics in square brackets in the text of the edition, rather than in footnotes.

If both the particulars of account and the controlment roll survive, certain variants have been suppressed to avoid inflating the text-critical apparatus. Thus, neither the substitution of 'y' in one text for 'i' in the other (e.g. Willyamson, Williamson) nor middle English plural variants (-es, -is, -ys etc.) have been noted in the apparatus criticus. In general, I have limited the notation of textual variants to those cases in which the variant spelling of a word changes the pronunciation. Thus, the variant *federbeds* will be noted against *fetherbeds*, but not *fedderbeds* or *federbeddes* against *federbeds*.

Punctuation is artificial and ignores all medieval full stops, commas and so forth. Since Latin is a syntactic language (like German), the eminently useful MGH convention – namely to employ punctuation (according to the pre-reform German

rules) to mark up the grammatical structure of the sentence – has been employed here. I have also broken up the stylistically elegant, but utterly incomprehensible run-on Latin sentences of the source texts into manageable units.

Since we are dealing with late medieval administrative Latin, there are some cases which call for local by-laws.

First of all, there are a number of middle English words embedded in the Latin texts which have to be assigned a gender, since they are often modified by an abbreviated adjective (e.g. *pro 1 parv' fetherbed*). Since the adjectives are written out in a number of instances (*pro 1 parvo fetherbed*), I have arbitrarily imposed a masculine grammatical gender on all middle English words rather than litter the edition with apostrophes.

Second, the sources themselves are in a muddle as to whether the words *custuma* and *subsidium* are singular or plural, and usually avoid the problem by writing *cust'* and *subs'*. If a scribe does write out the one or the other word, it is almost inevitable that he will contradict himself, writing *custuma* in one line and *custume* a few lines later. This muddle is not merely the result of scribal carelessness or low standards of Latinity. In the fifteenth century, it was possible to differentiate between the collective noun (in the singular) denoting the charges to be paid and the individual sums (in the plural) which each merchant rendered. Even bearing this in mind, however, scribes are simply not consistent. Taking each individual text as a whole, I have done my best to reproduce what the scribe seemed to be thinking.

Finally, on a personal note, it is a sad thing indeed to find oneself finishing a volume of English documents, which, being published in Germany, in itself represents a small, but not negligible link between the Continent and the Sceptered Isle, on the day after Brexit.

I
 WOOL CUSTOMS AND SUBSIDY
 PARTICULARS OF ACCOUNT
 AND CONTROLMENT ROLL
 29 SEPT. 1487 – 29 SEPT. 1488

Particulars of account of William Tysted and Henry Assheborne for the issues of the wool customs and subsidy in London in the period from 29 Sept. 1487 to 29 Sept. 1488 together with the controlment roll of Nicholas Suthworth for the same period

L1 TNA: PRO, E122/78/5. Original particulars of account bound as a codex (quire structure VI¹² + IV²⁰ + IV²⁸; while there is no overall contemporaneous numbering of the folios, the first half of the leaves of the individual quires – viz. 1-6 (= f. 1-6), 1-4 (= f. 13-17), 1-4 (= f. 21-24) – were numbered contemporaneously in Arabic numerals in the lower right hand corner of the recto side of the folio). Parchment. Unsealed. The auditor has entered a dot (a) above each packaging unit (be it sarpler, poke or pocket) as well as the sum total of wool (not, however, of woolfells) exported by each merchant, (b) above each summation of the individual ships and the summations of the issues of the coket on each page and (c) above each item in the summation of the issues on f. 27^v-28^r.

L2 TNA: PRO, E122/78/6. Original controlment roll bound in Exchequer style (6 membranes, of which the first five were numbered contemporaneously in Roman numerals in the apex above the stitching, the last half membrane remaining unnumbered). Parchment. Unsealed. ultimo die Marcii was entered by the scribal hand which wrote the controlment roll on m 3d in the apex, m 3d marking the beginning of the exports of the second fleet on 31 Mar. 1488; primo die Augusti was entered by the same scribal hand on m 5d in the apex to mark the beginning of the exports of the third fleet).

INDEX OF PEOPLE AND PLACES

In accordance with current usage, the first names of Englishmen and -women have been standardized to their current forms. Thus Willelmus in the accounts is indexed as William and so forth. Italian and Spanish first names are given in the 'ab-lative' (Andrea, Beaceo, Roderigo rather than Andreas, Beaceus, Roderigus). The first names of other foreigners, who are largely Dutch and German, are normally indexed in something approaching their modern forms in those languages, e.g. Johannes, Jacob, Herman, Hugo rather than Hugh (which would indicate an Eng-lishman). However, it is not possible to be entirely consistent. Take, as an example, Willelmus. Is one to index Hanseatic merchants as Wilhelm, but Dutch merchants and shippers as Willem or Wim and the Dinanters as Guillaume? To do so would simply be to introduce incredible confusion, entirely leaving aside the intractable problem of distinguishing between merchants of Dutch and Hanseatic origin. Therefore, in a number of cases I have indexed Dutch and German merchants' first names in the current English form: e.g. Paul, William, Laurence, Andrew, Henry. Family names have been grouped, where possible, in the index, with cross refer-ences leading the reader from the variants to the main entry, which records all vari-ant spellings in parentheses. However, given the inconsistency of the customers' scribes, I have found it impossible to resolve all doubts and have therefore tried to steer a middle course between the splitters and the lumpers, since there are numer-ous cases where there can be no doubt that divergent spellings denote one and the same merchant. On the other hand, there are cases where I am all but certain that variant spellings denote one person, yet am troubled by nagging doubts. In these cases, I recorded the names separately and referred back and forth. The order of the family names in the index is phonological, so that, for instance, 'y' is alphabetized as 'i'. Any additional information not given in the accounts them-selves appears in square brackets. Place names are in small capitals.

INDEX OF SUBJECTS

The index is structured so as to serve as a glossary. Hence, the main entry is under the word as it appears in the sources (*zinziber*), and a cross-reference leads the reader from the modern English term to the main entry (ginger see *zinziber*). If a term is in Middle English, the plural form is also given (e.g. *alle hafte*, *-s*); if in Latin, the genitive (e.g. *allec*, *ecis*). More than one reference per page is not noted.
