INTRODUCTION

This is the sixth volume of the Tudor series (Part IV) of the edition of the London customs accounts (TNA: PRO E122). It is comprised of the accounts for a single year, namely the wool customs and subsidy controlment roll and the petty customs particulars of account for 1505/06.

Everything the reader needs to understand about the English customs system – and the peculiarities of the customs administration in London – has been detailed in the introduction to the pilot edition.¹ There are, however, some issues particular to the petty customs account which need to be dealt with.

GILES BASSE

Against the beer exports executed by Giles Basse through various alien factors,² the auditor marginated *per breve*. In the first five cases, the entry itself states that the beer was exported by royal licence. The *determinatio* (p. 153) notes that Basse, an indigenous merchant, exported a total of 84¼ tuns of beer worth £84 5s, which were charged 21s ¾d petty customs at 3d/£, and this was duly recorded in the enrolled account.³

When the customers appeared before the whole Exchequer for the final audit of their account,⁴ they petitioned for exoneration for the auditor's surcharge of 21s ¾d imposed on the 84¼ tuns of beer exported by Basse's alien factors. In so doing, the customers cited the king's writ dated 11 Mar. 1504 directed to them, which they had retained (and which is untraceable). They then referenced the licence Henry VII had granted Giles Basse – in consideration of his services to the crown – to export 800 tuns of beer over the space of the next eight years without payment of customs, subsidy or other duties (Appendix I 1), the corresponding mandate to the Exchequer dated 20 Mar. 1504 (Appendix I 2) and finally the indenture they had drawn up with Basse on 14 Sept. 1506, recording the export of 84¼ tuns of beer

via London (between 18 Jan. and 29 Sept. 1506) without payment of customs (Appendix I 3). Finally, the customers noted that Basse had previously shipped 51 tuns of beer by authority of the king's licence, as the account of their predecessors in office William Holybrond and William Grene showed.⁵ The Exchequer accepted these arguments and granted the customers' petition, determining that Basse himself was to answer directly to the crown for the customs he had retained.⁶

NICHOLAS DUODO

Either by himself⁷ or through his deputies,⁸ the Venetian merchant Nicholas Duodo executed a number of imports and exports which the auditor carefully marked up. Against the imports he consistently marginated *per breve*, while the customs charge was often⁹ (but not always)¹⁰ written over erasure. Against Duodo's exports the auditor usually marginated *oneratur* or *nota oneratur*.¹¹ The *determinatio* (p. 152) records a surcharge of £32 4s 7d due on exports of 219 cloths and 4 yards (at 2s 9d/cloth) and miscellaneous merchandise worth £167 10s (at 3d/£). This surcharge was faithfully recorded in the enrolled account.¹²

When the customers appeared before the whole Exchequer for the final audit of their account,¹³ they petitioned for exoneration for this surcharge. Since explaining the genesis of Duodo's licence, which the customers cited to buttress their case, is complicated (to say the least), it is best to record the bare bones of the case first and then elucidate the licence. In support of their petition, the customers referenced (and summarized) the patent by which Henry VII had licenced Duodo to export wool, lead, tin and woollen cloth, via London and Dover to Italy by sea (*ad partes exterarum ultra montana per strictus de Marrok*) and import other merchandise, retaining the customs up to £200 (Appendix II 1). They then cited the king's writ dated 14 Nov. 1505 directed to themselves (untraceable) and the corresponding mandate to the Exchequer (Appendix II 2). Finally, they proffered their half of the indenture drawn up with Duodo on 14 Sept. 1506 (Appendix II 3). In closing, they noted that Duodo had previously retained £41 5s 1d of the £200 allowed, as shown

in the tunnage and poundage account of Nicholas Mattok and Ralph Bukkerd (1 Feb.-29 Sept. 1506).¹⁴ The Exchequer granted their petition.¹⁵

The genesis of Duodo's licence is a long story, one which goes back to the attacks perpetrated by English pirates on Spanish merchants on the high seas in the closing years of the reign of Edward IV. Since these depredations were in violation of the truce agreed between England and Castile-Leon,¹⁶ compensation was agreed. In part payment of the sum due to the Spanish victims, Edward IV requested Richard Welby esq. and William Dunthorn gtlmn. to pay £400 to the Spanish merchants' representatives Licenciatis de Larena (of Alcares) and Johannes Dares (of Bilbow). In order to repay Welby and Dunthorn for the money they had advanced, Edward granted them a licence on 16 July 1480¹⁷ to export wool and woolfells (by themselves or through their indigenous or alien factors, attorneys or deputies) and other non-staple merchandise via Southampton and Sandwich to Italy by sea (*ad partes exterarum ultra montana et per strictus de Marrok*) and import other goods from overseas, retaining customs and subsidy up to £133 6s 8d yearly for three years. However, it transpired that Welby and Dunthorn were only able to ship enough merchandise to retain £200, so that £200 were left in arrears. Therefore they surrendered Edward IV's licence in chancery for cancellation, and Henry VII in turn granted them a licence on 16 Aug. 1486 to export wool and woolfells via Boston to Calais, retaining customs and subsidy up to the remaining £200, without being required to deposit bullion in the royal mint in the Tower.¹⁸ However, Welby¹⁹ and Dunthorn²⁰ died before being able to exploit this licence, and William Walshe and his wife Joan, who was the executrix of † Elizabeth Dunthorn, who in turn had been the executrix of † William Dunthorn, who had survived Welby, surrendered the licence in chancery for cancellation, with the intention of its being granted to Duodo, the assignee of Walshe and his wife, in order that the debt of £200 be paid. Therefore, Henry VII granted Duodo a licence to export (either by himself or through his alien factors, attorneys or deputies) wool, lead, tin and

woollen cloth, via London and Dover to Italy by sea (*ad partes externas ultra montana per strictus de Marrok*), retaining the customs up to £200 and without being required to deliver bullion to the royal mint in the Tower.

HERMAN RYNG

There is a final case which deserves some discussion, even if it did not affect the crown's income. According to the enrolled account, the customers paid Herman Ryng, a Hanseatic merchant from Cologne, £30 (due for Easter and Michaelmas terms 1506) for the life annuity of £30 which Henry VII had granted him on 25 Nov. 1502, payable from the petty customs on merchandise imported and exported by Ryng and all other Hanseatic merchants trading with London. The entry in the enrolled account records this payment and its warranties.

Et Hermano Ryng, cui rex 25^{to} die Novembris anno 18^{vo} [25 Nov. 1502] dedit et concessit quandam annuitatem triginta librarum monete Anglie habendam et percipiendam annuatim prefato Hermano a festo sancti Michaelis Archangeli tunc ultimo preterito [29 Sept. 1502] pro termino vite ipsius Hermani de custumis regis provenientibus et crescentibus de quibuscumque bonis, rebus et mercandis tam predicti Hermani quam quorumcumque mercatorum et cujuscumque mercatoris Hanze seu Theutonice tam a partibus exteris in regnum regis Anglie in portum regis London' adductis et adducendis quam extra regnum regis predictum a portu predicto eductis et educendis, traductis et traducendis, per manus customariorum, collectorum sive aliorum receptorum parve custume regis in portu predicto pro tempore existencium ad festa Pasche et sancti Michaelis per equales porciones — £30 pro festis Pasche anno 21^{mo} et sancti Michaelis anno 22^{do} per breve regis, quod est inter communia de anno 18^{vo} termino sancti Michaelis rotulo 15^{mo} [Appendix III 1] et litteras acquietancie ipsius Hermani de recepta [untraceable].²¹

Now, one might expect that the customers would proceed to petition for exoneration for this payment when they appeared before the whole Exchequer for the final audit of their account. However, no such petition was recorded.²² Instead, the customers petitioned for allocation for an entirely different sum, supporting their case by referring to altogether different royal mandates. Here, they stated that Henry VII had granted Herman Ryng, a Hanseatic merchant from Cologne, an annuity of £20 for life on 2 Aug. 1502 (Appendix III 2), in recognition of his services to the crown. This annuity was to be disbursed by the London petty customers, provided Ryng paid at least £20 in petty customs on his own merchandise during the year. However, the payment due to him (for the tranches of his annuity due for Easter and Michaelmas terms 1506) was not effected by allowing him to retain customs. Rather, the customers simply paid Ryng £20 out of general funds, as shown by the indenture they drew up with Ryng on 28 Jan. 1507 (Appendix III 4). In support of their petition the customers cited the mandates the king had directed to themselves (*breve de liberate current*; untraceable) and to the Exchequer (*breve de allocate dormant*) on 17 Sept. 1502 (Appendix III 3). Finally,

they noted that Ryng, whose merchandise had been customed at the normal Hanseatic rates, had paid a total of £30 5s 4d of petty customs during the accounting period, which was more than enough to meet the threshold for payment of the annuity. The Exchequer granted their petition:²³

Et Hermano Rynk mercatori Almannie, cui rex Henricus vij^{mus} secundo die Augusti anno 17^{mo} [2 Aug. 1502] dedit et concessit pro se et heredibus suis viginti libras annuas habendas et percipiendas eidem Hermano annuatim durante vita sua per manus customariorum sive collectorum customarum regis in portu civitatis regis London' de custumis debitis et provenientibus de propriis bonis et mercandis ipsius Hermani tam a partibus exteris in regnum regis Anglie in portum regis predictum adducendis quam a portu predicto extra regnum regis predictum ad partes exterarum traducendis et cariandis, qui quidem Hermanus infra tempus predictum [viz. 17 Jan.-29 Sept. 1506] eskippavit tot et tantas mercandias, unde custuma regis in portu predicto ad summam £20 et ultra se attingunt, sicut continentur in particulis compoti predicti in custodia rememoratoris regis existentibus, videlicet de hujusmodi £20 per annum a festo sancti Michaelis anno 21^{mo} regis Henrici vij^{mi} [29 Sept. 1505] usque festum sancti Michaelis tunc proxime sequens [29 Sept. 1506], scilicet per unum annum integrum — £20 per processum inde habitum et considerationem baronum annotata ibidem [TNA: PRO, E368/280 Status et visus compotorum Hilary m 2].

The necessity of tracking the imports and exports of all Hanseatic merchants – and of Herman Ryng himself – explains a number of oddities in the particulars. Ryng's £30 annuity was predicated on Hanseatic merchants trading with London paying at least £30 in petty customs. Therefore, the customers had to identify all Hansards importing and exporting miscellaneous merchandise as such (e.g. *De Hermano Ryng, Hans, pro ...*).²⁴ This was fiscally immaterial, since Hanseatic merchants and other aliens paid the same rate of petty customs (3d/£), but it was crucial for determining whether to pay Ryng his annuity. However, the auditor was unwilling to take the customers' word that a particular merchant was Hanseatic. Therefore, the Hanse's London Counter was required to produce a certification of the names of all Hanseatic merchants trading with London in 1505/06, and this certification, dated 1 Feb. 1507, was sewn onto the *pes compoti* of the particulars (p. 153). Using this list, the auditor marked up all Hanseatic wax imports (marginating *cera Hans* against the entry) and miscellaneous imports and exports (marginating *val' Hans*). Only by checking the claims made in the particulars against the Counter's list could the auditor be certain that the claims were valid²⁵

²³ TNA: PRO, E372/357 Adhuc Item London'.

²⁴ All other aliens were equally identified as such (e.g. *De Anthonio Copylle, alienigena, pro ...*).

²⁵ Readers who take the time to compare the names in the Counter's certification with the particulars will quickly come to the conclusion that the London Counter certified a number of merchants as Hanseatic who do not appear in the particulars. The answer to this conundrum is, of course, that these merchants were active in the preceding accounting

and that the petty customs paid on the merchandise in question should be counted for the £30 threshold necessary for paying out Ryng's annuity. It was only consistent to record Hanseatic imports and exports of miscellaneous merchandise and wax separately in the *determinatio* (p. 152).

Ryng's £20 annuity was straightforward, depending, as it did, solely on the amount of petty customs Ryng paid on his own merchandise. It was simple enough to go through the particulars, adding up his customs payments, and calculate that he had paid £30 5s 4d in petty customs during the accounting period. Consequently, the customers, who had handed their particulars into the Exchequer on 22 Nov. 1506 and had been called in to account from 13 Jan. 1507 onwards, were prepared to pay out the £20 annuity on 28 Jan. 1507, although the Hanse's London Counter did not produce its certification until 1 Feb. 1507. The customers knew perfectly well who Ryng was, and simple counting had clearly sufficed to convince both the customers and the auditor that he had paid in excess of £20 in petty customs on his own merchandise, thus meeting the threshold qualifying him for payment of his £20 annuity.

MINOR MATTERS

There are a number of merchants whose exports the customers noted as having been executed *per licenciam domini regis*.²⁶ Since these exports were customed at the normal rates and did not affect the crown's income (and therefore did not interest the auditor or the Exchequer in the slightest), I have foregone discussion of them.

The customers' particulars of account were fiscal documents, forming an integral part of the procedure imposed on the customers when accounting for the crown's customs income before the Exchequer. As such, they were marked up by the auditor when he summed up the crown's income according to the various categories and tariffs. These marginated annotations form an integral part of the source and, in my view of it, deserve to be reproduced in full. I have done this in the following way. First of all, the auditor's summations of income at the end of each page or membrane (including the jottings reproducing the position of the counters on the counting table) have been reproduced as written in the account. Second, all other marginated notes (e.g. a cross or an asterisk indicating an error) are noted in the normal way in the critical apparatus. However, recording the eternally repetitive marginal notes on the tariff categories to which particular products belonged (*panni ind'*, *panni al'*, *panni Hans'*, *per breve* etc.) call for a different solution, since including them in the critical apparatus would simply blimp it up to no useful purpose. Consequently, I have indicated them in the text by employing superscript letters in angle brackets (e.g. ^{<a>}De Roberto Derlyngton) and

period (29 Sept. 1505-18 Jan. 1506). Note that the £30 threshold necessary for paying out Ryng's annuity related to trade in the entire year (Michaelmas to Michaelmas).

²⁶ To wit, the indigenous merchants John Burgges, William Haryot, Mathew Bowghton, Henry Patemer, John Banester and William Calley (all cloth exporters) as well as the alien merchant Ambrosio de Growett.

resolving these in a block at the bottom of the page (*Auditor's marginated notations L: <sup>a> panni ind'*).

The problem of the hundredweight is exceedingly vexed. While it is well known that a hundredweight can correspond to 100 lb., 112 lb. or 120 lb. avoirdupois,²⁷ there is no way to know which of these three values applies when a customer writes *c lb.* or fractions and multiples thereof. Just occasionally, when the particulars of account and the controlment roll have survived, some insight is possible, for instance if one of the two records a particular merchant's exports of pewter vessels as *di' c lb. vasorum stanni* and the other the same goods as *lvj lb. vasorum stanni*.²⁸ But these cases are far too rare to inspire confident generalizing. Consequently, I have decided to leave the matter unsolved, marking the text in such a way that the reader can easily reconstruct the entry. The most common notation of weight – multiples of 'c' – has not been marked up. Thus *ijj^c lb.* is simply transcribed as 300 lb. If the thousand sign was used, the number is marked with a cross: thus, *ij M^l lb.* is transcribed as 2000[†] lb. (but *xx^c lb.* as 2000 lb.) If the sign for one half is used, this is indicated by an asterisk: thus, *di' c lb.* is transcribed as 50* lb. (but *l lb.* as 50 lb.) And finally, if the sign for one quarter is used, this is indicated by a double cross: thus, *c q' lb.* is transcribed as 125[‡] lb.

Diplomatic Notes on the Form of the Edition

The transcriptions of Latin documents in this edition observe the conventions of the *Monumenta Germaniae Historica*. The source texts (and all variants) are reproduced in normal type, while editorial intrusions are printed without exception in italics (e.g. *mardre L3, in error*). Unambiguous abbreviations are expanded silently, without using square brackets or italics to indicate missing letters. u/v and i/j have been regularized silently to accord with pronunciation: thus *vniuersalis* in the source text is rendered *universalis*, while 'i' is transcribed if the letter is pronounced as a vowel (*imperii*), and 'j' if the letter is pronounced as a consonant, i.e. like the 'y' in 'you' (*majestas*), even if the source writes *imperij* and *maiestas*.

Personal names and place names are transcribed exactly as written and only regularized in the Index of People and Places.

Roman numerals are reproduced as Arabic numerals, except for the sovereign's ordinal (*Edwardi ivth*). Arabic numerals which occur in the source texts are indicated by bold type. *ob'* is given as ½d, *q'* as ¼d and *ob' q'* as ¾d.

Following the convention in German, I have used a full stop after a number to indicate the ordinal rather than the cardinal, if a number is not written out. Thus, *27. die Januarii* (p. 147) is to be understood as *vicesimo septimo die Januarii*, rather than *viginti septem die Januarii*.

When transcribing the customs accounts, I have numbered the ships consecutively in italics in square brackets. The individual paragraphs of longer texts

²⁷ OED s.v. hundredweight.

²⁸ Therefore, when transcribing entries regarding the export of pewter vessels, I have retained the hundredweight (e.g. *pro 9 centenis vasorum stanni*).

have also been numbered in the same way. The reason for this is that the web version of the accounts and accounting materials for the Lancastrian period has no pagination, since the amount of text displayed on the screen depends on the size of the monitor and its resolution. Consequently, cross references – whether within a single document, from one document to another or in the indices – to 'page thus-and-such' are meaningless, and some internal sub-division of the text which can be linked in is unavoidable. Since some scholars will want to use the printed version of the edition and others the web edition, it is necessary to provide a common basis. Thus, if one scholar refers to ship No. 24 in the digital version of a particular account, those using the printed version will be able to find the vessel in question.

All dates and cross references in the source texts have been resolved in italics in square brackets in the text of the edition, rather than in footnotes.

If both the particulars of account and the controlment roll survive, certain variants have been suppressed to avoid inflating the text-critical apparatus. Thus, neither the substitution of 'y' in one text for 'i' in the other (e.g. Willyamson, Williamson) nor middle English plural variants (-es, -is, -ys etc.) have been noted in the apparatus criticus. In general, I have limited the notation of textual variants to those cases in which the variant spelling of a word changes the pronunciation. Thus, the variant *federbeds* will be noted against *fetherbeds*, but not *fedderbeds* or *federbeddes* against *federbeds*.

Punctuation is artificial and ignores all medieval full stops, commas and so forth. Since Latin is a syntactic language (like German), the eminently useful MGH convention – namely to employ punctuation (according to the pre-reform German rules) to mark up the grammatical structure of the sentence – has been employed here. I have also broken up the stylistically elegant, but utterly incomprehensible run-on Latin sentences of the source texts into manageable units.

Since we are dealing with late medieval administrative Latin, there are some cases which call for local by-laws.

First of all, there are a number of middle English words embedded in the Latin texts which have to be assigned a gender, since they are often modified by an abbreviated adjective (e.g. *pro 1 parv' fetherbed*). Since the adjectives are written out in a number of instances (*pro 1 parvo fetherbed*), I have arbitrarily imposed a masculine grammatical gender on all middle English words rather than litter the edition with apostrophes.

Second, the sources themselves are in a muddle as to whether the words *custuma* and *subsidium* are singular or plural, and usually avoid the problem by writing *cust'* and *subs'*. If a scribe does write out the one or the other word, it is almost inevitable that he will contradict himself, writing *custuma* in one line and *custume* a few lines later. This muddle is not merely the result of scribal carelessness or low standards of Latinity. In the fifteenth century, it was possible to differentiate between the collective noun (in the singular) denoting the charges to be paid and the individual sums (in the plural) which each merchant rendered. Even bearing this in mind, however, scribes are simply not consistent. Taking each individual text as a whole, I have done my best to reproduce what the scribe seemed to be thinking.

Appendix II: Nicholas Duodo of Venice

1 *Henry VII to all: Since Edward IV, in payment of £400 which Richard Welby esq. and William Dunthorn gtlmn. had paid at his request to the Spanish merchants Licenciatis de Larena (of Alcares) and Johannes Dares (of Bilbow) in part compensation for injuries done by English pirates, subjects of Edward IV, to the subjects of the king of Castile and Leon in violation of the truce between Edward IV and the king of Castile and Leon, by patent granted on 16 July 1480²⁹ a licence to Welby and Dunthorn to export wool and woolfells (by themselves or through their indigenous or alien factors, attorneys or deputies) and other non-staple merchandise via Southampton and Sandwich to Italy by sea (ad partes exterarum ultra montana et per strictus de Marrok) and import other goods from overseas, retaining customs and subsidy up to £133 6s 8d yearly for three years, but Welby and Dunthorn had only been able to ship enough merchandise to retain £200, so that £200 were left in arrears. Therefore they surrendered Edward IV's licence in chancery for cancellation, and Henry VII in turn granted them a licence on 16 Aug. 1486 to export wool and woolfells via Boston to Calais, retaining customs and subsidy up to £200 and without being required to deposit bullion in the royal mint in the Tower.³⁰ However, Welby and Dunthorn died before making use of this licence, and William Walshe and his wife Joan, who was the executrix of the will of † Elizabeth Dunthorn, who in turn had been the executrix of † William Dunthorn, who had survived Welby, surrendered the licence in chancery for cancellation, in order for it to be granted to Duodo, the assignee of William Walshe and his wife Joan, in order that the debt of £200 be paid. Therefore, Henry VII now grants a licence to Nicholas Duodo, merchant of Venice, to export (either by himself or through his alien factors, attorneys or deputies) wool, lead, tin and woollen cloth, via London and Dover to Italy by sea (ad partes exterarum ultra montana per strictus de Marrok), retaining the customs up to £200 and without being required to deliver bullion to the royal mint in the Tower. — 1505 Nov. 7 (Teste me ipso apud Westmonasterium, 7. die Novembris anno regni nostri vicesimo primo). Therefore they surrendered Edward IV's licence in chancery for cancellation, and Henry VII in turn granted them a licence on 16 Aug. 1486 to export wool and woolfells (by themselves or through their indigenous or alien factors, attorneys or deputies) via Boston to Calais, retaining customs and subsidy up to £200 and without being required to deposit bullion in the royal mint in the Tower.³² However, Welby and Dunthorn died before they (or their executors or administrators) could make use of this licence, and William Walshe and his wife Joan, who was the executrix of the will of † Elizabeth Dunthorn, who in turn had been the executrix of † William Dunthorn, who had survived Welby, surrendered the licence in chancery for cancellation, in order for it to be granted to the Venetian merchant Nicholas Duodo, the assignee of William Walshe and his wife Joan, in order that the debt of £200 be paid. Therefore, Henry VII had [on 7 Nov. 1505] granted a licence to Duodo to export (either by himself or through his alien factors, attorneys or deputies) wool, lead, tin and woollen cloth, via London and Dover to Italy by sea (ad partes exteras ultra montana per strictus de Marrok), retaining the customs up to £200 and without being required to deliver bullion to the royal mint in the Tower. And since, moreover, Henry VII had ordered the customers in London and Dover to allow Duodo to export the said goods by the terms of the licence without hindrance, recording all shipments in indentures to be drawn up by the customers and Duodo (or his attorneys and deputies). Therefore the king orders the Exchequer to exonerate the customers for all sums retained by Duodo (or his factors, attorney or deputies), provided they produce the mandate directed to them and their half of the indentures*

PETTY CUSTOMS
PARTICULARS OF ACCOUNT
18 JAN. – 29 SEPT. 1506

Particulars of account of William Grene and John Warnet for the issues of the petty customs in London during the period from 18 Jan. to 29 Sept. 1506

L TNA: PRO, E122/79/12. Original particulars of account bound in Exchequer style (23 membranes, of which m 1-22 were contemporaneously numbered in Roman numerals at the bottom centre, while the pes compoti (m 23) remained unnumbered; dots have been entered (presumably by the auditor, but not with any great consistency) (a) on the import membranes above the total value of each merchant's cargo (or the total number of quintals of wax); (b) on the export membranes above the total value of merchandise customed ad valorem or each cloth exporter's 'nationality' (indigenous, alien, Hansard) and (c) each item and charge in the pes compoti (m 23)). Parchment. Unsealed.

INDEX OF PEOPLE AND PLACES

In accordance with current usage, the first names of Englishmen and -women have been standardized to their current forms. Thus Willelmus in the accounts is indexed as William and so forth. Italian and Spanish first names are given in the 'ablative' (Andrea, Beaceo, Roderigo rather than Andreas, Beaceus, Roderigus). The first names of other foreigners, who are largely Dutch and German, are normally indexed in something approaching their modern forms, e.g. Johannes, Jacob, Herman, Hugo rather than Hugh (which would indicate an Englishman). However, it is not possible to be entirely consistent. Take, as an example, Willelmus. Is one to index Hanseatic merchants as Wilhelm, but Dutch merchants and shippers as Willem or Wim and the Dinanters as Guillaume? To do so would simply be to introduce incredible confusion, entirely leaving aside the intractable problem of distinguishing between merchants of Dutch and Hanseatic origin. Therefore, in a number of cases I have indexed Dutch and German merchants' first names in the current English form: e.g. Paul, William, Laurence, Andrew, Henry.

Family names have been grouped, where possible, in the index, with cross references leading the reader from the variants to the main entry, which records all variant spellings in parentheses. However, given the inconsistency of the customers' scribes, I have found it impossible to resolve all doubts and have therefore tried to steer a middle course between the splitters and the lumpers. There are cases where there can be no doubt that divergent spellings denote one and the same merchant. On the other hand, there are cases where I am all but certain that variant spellings denote one person, yet am troubled by nagging doubts. In these cases I record the names separately and referred back and forth ('see also N.N.').

The order of the family names in the index is phonological, so that, for instance, 'y' is alphabetized as 'i'.

Place names are in small capitals.

INDEX OF SUBJECTS

The index is structured so as to serve as a glossary. Hence, the main entry is under the word as it appears in the sources (*zinziber*), and a cross-reference leads the reader from the modern English term to the main entry (ginger see *zinziber*). If a term is in Middle English, the plural form is also given (e.g. *alle hafte*, -s); if in Latin, the genitive (e.g. *allec*, *ecis*). More than one reference per page is not noted.
